Maryam Bakoshi: Dear all, welcome to NCSG CRM call on 27 May 2016 at 1500 UTC

Martin Peth: Hello, I've managed to enter the conference - what's next?

Maryam Bakoshi: Welcome, Martin and Tapani

Tapani Tarvainen: Martin, can you hear us?

Martin Peth: yes

Martin Peth: but you can't hear me - right?

Tapani Tarvainen: Could you speak, we can't hear you?

Martin Peth: should i dial in?

Martin Peth: or would you call me?

Maryam Bakoshi: Please

Maryam Bakoshi: either is fine

Sam Lanfranco: Martin, Is the mic symbol in upper left of screen green?

Martin Peth: i'll call wait a sec

Sam Lanfranco: RE: implementing ACL-based permissioning to grant access only to the contactdata that belongs to one's constituency., ??? With a two layer membership (NPOC & NCUC within NCSG) not quite clear how this would work. I would see all in NCSG and ability to pull subset of NPOC & NCUC out for own uses.

Rafik: lost sound?

Martin Peth: that didn't work they couldn't connect me. please try to call me 0049-2247-745581

Rafik: yes

Maryam Bakoshi: Sure

Maryam Bakoshi: We have requested dial out to you Martin

Sam Lanfranco: I agree, just referenceing the Martin sentence.

Sam Lanfranco: One issue: Beyond membership data management, how do we see NCSG NCUC.NPOC dividing effert between the civiCRM site and the other ICANN, etc. work sites? I would see minimal use of the other cviCRM applications with (maybe) migration over time.

Rafik: you are using scrum

Martin Peth: https://www.robhost.de/

Sam Lanfranco: I would propose migrating only part of the existing member record, and having the members update and complete their record.

Maryam Bakoshi: 581

Rafik: yes sure

Rafik: bye
