ICANN Speakers Bureau Request Form

Thank you for contacting ICANN regarding your upcoming event. The ICANN Speakers Bureau will help identify the ICANN speaker that will be the best fit for your event. Please provide us information about your event. Below is a quick questionnaire to get the process started.

(* = required field)

Name of the Event *

Event Date * Day Month Year

Location of Event *

Name of Hosting Organization *

Does the organization have a relationship with ICANN?

Please describe.

Purpose of the event

Please describe goals and objectives.

Describe the audience

Please specify titles, industry sectors, knowledge level of topic you are seeking an ICANN speaker.

Size of audience for the event

Size of audience for specific session you are seeking an ICANN speaker

What topic (s) would you like an ICANN speaker to address: *

- Internet Governance
- New gTLDS Program
- Property & Trademark
- ICANN Multi-stakeholder model
- Cyber-security issues
- IPv6 adoption
- DNS topics
- DNSSEC adoption
- IANA topics
- IDNS topics
- WHOIS
- How ICANN Works
- Becoming part of ICANN
- ICANN Strategic Plan
- Other (Please specify)

What is the language of the event?

Has an ICANN Speaker participated in the past? *

- No
- Yes

Presentation Format: (Indicate all that apply) *

- Keynote
- Panel
- Concurrent Session

Are any other speakers invited? If so, who? *

Website for the event

Your Name *

Your Email Address *

Your Phone Number *

Your Location (Country) *

-Select-
Afghanistan
Aland Islands
Albania
Algeria

Brief Overview

Purpose: The Preliminary Issue Report [PDF, 376 KB] is published for public comment to obtain community input on the issue of launching a GNSO Policy Development Process to Review all Rights Protection Mechanisms in all gTLDs.

Current Status: On 15 December 2011 the GNSO Council requested that 18 months after the launch of the New gTLD Program, ICANN staff prepare and publish a Issue Report on the state of all rights protection mechanisms implemented for both existing and new gTLDs, including but not limited to the Uniform Domain Name Dispute Resolution Policy (UDRP) and the Uniform Rapid Suspension System (URS). This Preliminary Issue Report is the result of that request.

Next Steps: Staff will review all comments and, based on the feedback, make amendments before forwarding the Final Issue Report to the GNSO Council for consideration.

Report of Public Comments

Section I: Description, Explanation, and Purpose

If a PDP to review all the RPMs is launched, the previous 2011 collation of community comments concerning a possible review of the UDRP and the more recent compilation of feedback concerning provider and user experiences with the new RPMs collectively provide a useful list of issues through which the PDP can be framed and chartered. Because a potential PDP can result in changes to a longstanding ICANN Consensus Policy and possible uncertainty in the future operations of the UDRP or the new RPMs, and because there are other ongoing review efforts that may yield useful information for a PDP, staff has included in this Preliminary Issue Report a number of additional factors to be considered in deciding whether or not to initiate a PDP (see Section 4.2 of the Preliminary Issue Report). Staff has also suggested several ways in which the work of the PDP Working Group can be organized in order to facilitate an effective outcome.

Section II: Background

The question of who legally has rights to, or is the legitimate holder of, a domain name can be open to dispute. In relation to domain name disputes concerning the registration and use of legally protected trademarks, the Uniform Dispute Resolution Policy (UDRP) is the longest standing alternative dispute resolution procedure. As a result of the New gTLD Program, several new rights protection mechanisms (RPMs) were developed to mitigate potential risks and costs to trademark rights holders that could arise in the expansion of the gTLD namespace: the Uniform Rapid Suspension Dispute Resolution Procedure (URS); the Trademark Clearinghouse (TMCH) and the associated availability through the TMCH of Sunrise periods and the Trademark Claims notification service; and the Post-Delegation Dispute Resolution Procedures (PDDRPs).

Prior to the launch of the New gTLD Program, on 3 October 2011 ICANN staff had published a Final Issue Report on the current state of the UDRP. The recommended course of action in that UDRP Report was not to initiate a PDP at the time, but to hold off launching any such PDP until after the new URS had been in operation for at least eighteen (18) months.

Subsequently, on 15 December 2011, the GNSO Council requested that ICANN staff prepare and publish a new Issue Report on the current state of all rights protection mechanisms implemented for both existing and new gTLDs, including but not limited to the UDRP and URS. This Preliminary Issue Report is being published for public comment as the result of that GNSO Council request.

Initial Report on Data & Metrics for Policy Making Date: 29 July 2015

Initial Report on the
Data & Metrics for Policy Making
Working Group

STATUS OF THIS DOCUMENT

This is the Initial Report on Data & Metrics for Policy Making (DMPM), prepared for public comment. A Final Report will be prepared by the DMPM Working Group and ICANN staff following review of public comments on this Initial Report.

SUMMARY

While this Working Group is not a Policy Development Process (PDP), this report is submitted to the GNSO and posted for public comment in accordance with the PDP Manual.

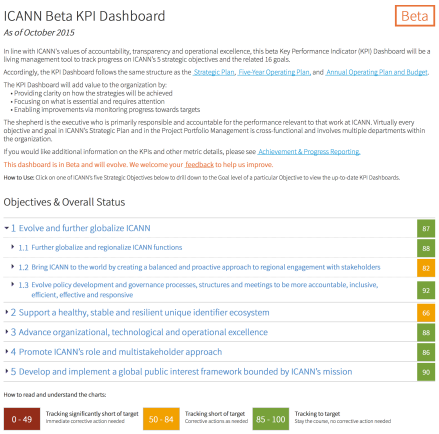
Brief Overview			
Originating Organization:	ICANN		
Categories/Tags:	Contracted Party Agreements		
Purpose (Brief):	To receive public comment for Board consideration on the Proposed Revised Process for Handling Requests for Removal of Cross-Ownership Restrictions on Operators of Existing gTLDs.		
Current Status:	Existing registries do not currently have a process to seek removal of cross-ownership restrictions related to names in the TLDs they operate.		
Next Steps:	Following Public Comment, staff will summarize and provide to Board for consideration of revised proposal. The Board will then take action on the Proposal.		
Staff Contact:	Kurt Pritz, Sr. VP, Stakeholder Relations	**Email:**	kurt.pritz@icann.org
Detailed Information			
Section I: Description, Explanation, and Purpose			
To seek public comment on a proposed process whereby existing registries may ask to amend their agreements so that they can vertically integrate with respect to selling domain name registrations in the TLDs that they operate.			
Section II: Background			
On 20 June 2011, ICANN approved a process, by which existing gTLD registries could request relief from cross ownership restrictions on registrars to sell domain names in *new* gTLDs (see http://www.icann.org/en/resources/registries/removal-cross-ownership). The recommendation was based on extensive independent analysis and community discussion. The registry agreements that are currently in place have cross ownership restrictions. The Board resolution approving the process stated, "consideration of modification of existing agreements to allow cross-ownership with respect to the operation of existing gTLDs is deferred pending further discussions including with competition authorities." That process did not allow the lifting of restrictions on the existing gTLD registries from owning or controlling a registrar that sells domains in *their own existing* registries (see http://www.icann.org/en/minutes/resolutions-20jun11-en.htm). In preparation for lifting this last set of restrictions, exchanges have occurred with competition authorities that have expressed interest in this issue. With an understanding and consideration of the concerns and issues raised by those authorities relating to market power, ICANN is now ready to post a revised process that would allow existing registry operators to request removal of cross-ownership restrictions for the gTLDs that they operate. Commencing a public comment period on the proposed revised process at this time is intended to solicit community input for Board consideration. The proposed revised process is posted in redline against the process that was approved on 20 June 2011.			
Section III: Document and Resource Links			
http://www.icann.org/en/resources/registries/proposed-removal-cross-ownership-18may12-en.pdf [PDF, 304 KB]			
Section IV: Additional Information			
None			

(*) Comments submitted after the posted Close Date/Time are not guaranteed to be considered in any final summary, analysis, reporting, or decision-making that takes place once this period lapses.

ICANN-0501 ICANN Beta KPI Dashboard (collapsed)

Status: Completed

https://www.icann.org/progress



ICANN Beta KPI Dashboard

Beta

As of October 2015

In line with ICANN's values of accountability, transparency and operational excellence, this beta Key Performance Indicator (KPI) Dashboard will be a living management tool to track progress on ICANN's 5 strategic objectives and the related 16 goals.

Accordingly, the KPI Dashboard follows the same structure as the Strategic Plan, Five-Year Operating Plan, and Annual Operating Plan and Budget.

The KPI Dashboard will add value to the organization by:
- Providing clarity on how the strategies will be achieved
- Focusing on what is essential and requires attention
- Enabling improvements via monitoring progress towards targets

The shepherd is the executive who is primarily responsible and accountable for the performance relevant to that work at ICANN. Virtually every objective and goal in ICANN's Strategic Plan and in the Project Portfolio Management is cross-functional and involves multiple departments within the organization.

If you would like additional information on the KPIs and other metric details, please see Achievement & Progress Reporting.

This dashboard is in Beta and will evolve. We welcome your feedback to help us improve.

How to Use: Click on one of ICANN's five Strategic Objectives below to drill down to the Goal level of a particular Objective to view the up-to-date KPI Dashboards.

Objectives & Overall Status

1 Evolve and further globalize ICANN	87
1.1 Further globalize and regionalize ICANN functions	88
1.2 Bring ICANN to the world by creating a balanced and proactive approach to regional engagement with stakeholders	82
1.3 Evolve policy development and governance processes, structures and meetings to be more accountable, inclusive, efficient, effective and responsive	92
2 Support a healthy, stable and resilient unique identifier ecosystem	66
3 Advance organizational, technological and operational excellence	88
4 Promote ICANN's role and multistakeholder approach	86
5 Develop and implement a global public interest framework bounded by ICANN's mission	90

How to read and understand the charts:

0 - 49 Tracking significantly short of target. Immediate corrective action needed

50 - 84 Tracking short of target. Corrective actions as needed

85 - 100 Tracking to target. Stay the course, no corrective action needed
