

# Experience of « dotCI »

Mireille HOUNDJI

In Charge of DotCI in ARTCI

# Agenda

- Internet Ecosystem In CI
- Technical Aspect
- Political Aspect
- Needs and Projects

# Internet Ecosystem In CI

- Population  $\approx$  20 million
- Internet Subscriber = 121 544 abonnés (End of 1st Trimester 2014)
- 2 Big ISP (AVISO and AFNET)
- Turnover : 4,8 milliard FCFA ( $\approx$ 9,6 million \$) for 2014 and 30 208 482 milliard FCFA ( $\approx$ 9,6 million \$) for 2013

# Technical Aspect

- 7 servers Around the World (3 in CI)
- DNS – Sec : No
- IPv6 : Compatibility but not complete migration

# Political Aspect

- Management Model: 3R
- The new REGISTRY is ARTCI (ICT/Telecommunication Regulator Authority) designed by a law since 2012. Practically, we finish officially the transfert operation with the registry (University) since Feb 2014.
- Not Yet Began the ICANN Re-delegation
- 16 registrars
- Dot ci Price Registry – Registrars = 10\$
- Dot Price Final Market = 20 \$
- 7000 Dot CI

# DNS Governance

- With Last Registry -- We signed a 2 years partnership with the University for capacity building and political proposition
- With Registrar, we organize many meeting with them in order to collect their proposition about management and we have submit them Writing of a New Naming Policy

# Needs/projects

- Capacity Building → Managers and Technician
- Politic and management environment (Registrar Accreditation – Naming Policy etc.)
- Competitiveness
  - Implementation of an Automatic Tool (CoCCa)
- Cooperation (Other ccTLD and Partners)
