11) Proposed Goals and Outcomes: >> Content Guidelines (click here)	Type of presentation: Lightning Talk - 5min Topics for presentation: DNS service operation and configuration Research and education Presentation title: Content Regulation and Private Ordering at Internet Governance Institutions Abstract An attachment with a draft of the presentation slides or an extended summary of the article/work to be presented. This abstract must not exceed one thousand (1000) words. IMPORTANT: This proposal is similar to the NCUC session in IGF2017 and will bring authors also remotely for this debate via video. Private ordering is common in the field of Internet governance, cybersecurity, and cybercrime. Private ordering refers to governance by means of contracts, markets, or voluntary cooperative networks of non-state actors. The Internet relies heavily on private ordering because it is difficult for territorial governments to regulate effectively by traditional methods of intervention. Private ordering is used in Internet governance institutions such as the Internet Corporation for Assigned Names and Numbers (ICANN). ICANN implements policies through contractual agreements and develops policies via a multistakeholder process rooted in non-state actors. Nevertheless, ICANN's control of the root of the Domain Name System (DNS) creates a centralized "choke point" where control over website content and Internet expression can be exerted by regulating domain name registries and registrars (e.g., by taking down domains or withdrawing licenses to register names). Most stakeholders believe that ICANN's authority to coordinate and make policy for the DNS should not be leveraged to make ICANN a content regulator on the Internet. As part of ICANN's reform process, a new mission statement was adopted which expressly forbids ICANN from engaging in content regulation. Some interest groups, however, often put pressure on ICANN to use its power over domains to become an internet regulator. Most notably, this pressure comes from copyright and trademark interests, law enforcement agencies, and some governments.
Please develop specific goals/outcomes for as many of the following categories as applicable: 1) Workshops/Seminars/Presentations including roles (e.g., speaker, facilitator, organizer), relevant content, literature to be disseminated, and specific purposes/objectives. 2) Engagement/Outreach including broadening awareness of ICANN in targeted regional areas (e.g., under-represented). 3) Recruitment including formal/informal invitations to become involved in ICANN stakeholder communities, working groups, and /or fellowship programs. 4) Fulfillment of documented Outreach Strategic Plans and/or ICANN Regional Strategies . 5) Knowledge Sharing including intentions to extend learnings within and among ICANN stakeholder communities.
