

Sunrise Sub Team Recommendations for RPM PDP Working Group Discussion

[Status Check - Draft as of 24 June 2019]

NOTE: All colored text are Sub Team deliberations, which are tentative and will be removed from this document when it is final. Green text are excerpts from Sub Team mailing list. Grey text are Sub Team discussions. Blue text are excerpts from Sunrise Q8/Q12 Google Doc. Red text are staff notes.

Table 1 is a snapshot of the overall status of the Sunrise Sub Team's deliberation on each agreed charter question and development of proposed answers, preliminary recommendations (if any), and proposed questions for community input (if any).

Table 2 aims to consolidate, in a clear and concise manner, the Sub Team's proposed answers, preliminary recommendations, and proposed questions for community input in relation to each agreed Sunrise charter question. **Sub Team Co-Chairs, in collaboration with staff, proposed the text. When finalized, this table will not include Sub Team discussions and deliberations.** All colored text are Sub Team deliberations, which are tentative and will be removed from this document and stored in the Sub Team's Summary Table.

Table 3 is a snapshot, based on Sub Team Co-Chairs' preliminary assessment, of the results of the review of all individual proposals received from Working Group members. Details and additional context are contained in the Sub Team's Summary Table and the Sub Team's weekly progress reports.

NOTE: All colored text are deliberations, which will NOT be included in the “status check” document when it is finalized. Green text are excerpts from Sub Team mailing list. Grey text are Sub Team discussions. Blue text are excerpts from Q8/Q12 Google Doc. Red text are staff notes.

Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q1(a): <i>Should the availability of Sunrise registrations only for identical matches be reviewed?</i></p> <p>Proposed Answer: The Sub Team generally agreed that the availability of Sunrise registrations only for identical matches should not be reviewed.</p>	<p>The Sunrise Sub Team recommends that the current availability of Sunrise registrations only for identical matches should be maintained, and the matching process should not be expanded.</p>	
<p>Q1(b): <i>If the matching process is expanded, how can Registrant free expression and fair use rights be protected and balanced against trademark rights?</i></p> <p>Proposed Answer: The Sub Team generally agreed that the matching process should not be expanded.</p>		
QUESTION 2		
Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q2 Threshold: <i>Is Registry pricing within the scope of the RPM WG or ICANN's review?</i></p> <p>Proposed Answer: The Sub Team had diverging opinions on whether registry pricing is within the scope of the RPM PDP WG.</p>		

NOTE: All colored text are deliberations, which will NOT be included in the “status check” document when it is finalized. Green text are excerpts from Sub Team mailing list. Grey text are Sub Team discussions. Blue text are excerpts from Q8/Q12 Google Doc. Red text are staff notes.

Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Some Sub Team members pointed to the Registry Agreements that state that registry pricing is not within the scope of the RPM WG due to the picket fence. Specifically, Section 1.4.1 of the Registry Agreement and Section 1.4.1 of the Registrar Accreditation Agreement respectively specify that Consensus Policies shall not prescribe or limit the price of Registry Services and Registrar Services. However, some Sub Team members expressed concerns about the interplay of Registry pricing with RPMs obligations, which are discussed further in the proposed answer to Q2(a)-(b).</p>		
<p>Q2(a): <i>Does Registry Sunrise or Premium Name pricing practices unfairly limit the ability of trademark owners to participate during Sunrise?</i></p> <p>Proposed Answer: The Sub Team generally agreed that Registry Sunrise or Premium Name² pricing practices have limited the ability of some trademark owners to participate during Sunrise. The Sub Team is</p>	<p>The Sunrise Sub Team recommends that the Registry Agreement include a provision stating that a Registry Operator shall not operate its TLD in such a way as to have the effect of circumventing the mandatory RPMs imposed by ICANN or restricting brand owners’ reasonable use of the Sunrise rights protection mechanism. [STAFF NOTE: check the Registry Agreement and see where this recommendation can be applied]</p>	

² **Premium Name:** second level domain names that are offered for registration that, in the determination of the registry, are more desirable for the purchaser. **Premium Pricing:** second level domain names that are offered for registration, that in the determination of the registry are more desirable for the purchaser, and will command a price that is higher than a non-premium name.

<p>aware of cases where the Registry Operator practices unfairly limited the ability of some trademark owners to participate during Sunrise, when pricing set for the trademark owners was exponentially higher than other Sunrise pricing or General Availability pricing.</p>		
<p>Q2(b): <i>If so, how extensive is this problem?</i></p> <p>Proposed Answer: The Sub Team noted this problem seems sufficiently extensive that it may require a recommendation to address it, although the data is limited. The Sub Team also noted that pricing is outside the picket fence.</p>		
QUESTION 3		
Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q3(a): <i>Should Registry Operators be required to create a mechanism that allows trademark owners to challenge the determination that a second level name is a Premium Name or Reserved Name?</i></p> <p>Proposed Answer: The Sub Team had diverging opinions on whether Registry</p>

Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Operators should be required to create a mechanism that allows trademark owners to challenge the determination that a second level name is a Premium Name or Reserved Name.</p> <p>The Sub Team noted that this question covers both Premium Names and Reserved Names, which are very different. Premium Names are not clearly defined, as a Registry Operator can have multiple pricing tiers.</p>		
<p>Q3(b): <i>Additionally, should Registry Operators be required to create a release mechanism in the event that a Premium Name or Reserved Name is challenged successfully, so that the trademark owner can register that name during the Sunrise Period?</i></p> <p>Proposed Answer: Since there was no wide support for a challenge mechanism within the Sub Team, the Sub Team did not consider this question.</p>		
<p>Q3(c): <i>What concerns might be raised by either or both of these requirements?</i></p> <p>Proposed Answer: Some Sub Team members</p>

noted some possible concerns, but there were no wide support within the Sub Team for those concerns. Hence the Sub Team did not develop an answer to this question.

QUESTION 4

Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
-----------------	----------------------------	---------------------------------------

Q4(a): *Are Registry Operator Reserved Names practices unfairly limiting participation in Sunrise by trademark owners?*

Proposed Answer: Some Sub Team members believe that certain Registry Operators’ Reserved Names practices may be unfairly limiting participation in Sunrise by trademark owners, but the Sub Team did not come to a conclusion on this point.

Q4(b): *Should Section 1.3.3 of Specification 1 of the Registry Agreement be modified to address these concerns?*

Proposed Answer: The Sub Team did not agree that there are concerns that should be addressed with regard to Section 1.3.3..

Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q4(c): <i>Should Registry Operators be required to publish their Reserved Names lists -- what Registry concerns would be raised by that publication, and what problem(s) would it solve?</i></p> <p>Proposed Answer: The Sub Team had diverging opinions on whether Registry Operators should be required to publish their Reserved Names lists.</p> <p>Some Sub Team members noted several possible registry concerns if Registry Operators were required to publish their Reserved Names lists.</p> <p>Other Sub Team members discussed possible problems that the publication of the Reserved Names lists could solve.</p>		
<p>Q4(d): <i>Should Registry Operators be required to provide trademark owners in the TMCH notice, and the opportunity to register, the domain name should the Registry Operator release it – what Registry concerns would be raised by this requirement?</i></p> <p>Proposed Answer: The Sub Team did not</p>

<p>discuss this question due to the consideration that it is more appropriate for the TMCH discussion and it is not within the scope of Sunrise concerns.</p>		
<p>QUESTION 5(a)</p>		
Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q5(a): Does the current 30-day minimum for a Sunrise Period serve its intended purpose, particularly in view of the fact that many Registry Operators actually ran a 60-day Sunrise Period?</p> <p>Proposed Answer: The Sub Team generally agreed that the current 30-day minimum for a Start Date Sunrise Period appears to be serving its intended purpose.</p>	<p>The Sunrise Sub Team recommends, in general, that the current requirement for the Sunrise Period be maintained, including for 30-day minimum period for a Start Date Sunrise and the 60-day minimum period for an End Date Sunrise.</p>	
<p>Q5(a)(i): Are there any unintended results?</p> <p>Proposed Answer: Some Sub Team members believe that there are unintended results, such as complications when many TLDs are launched simultaneously for the Start Date Sunrise for 30 days. Other Sub Team members believe that the 30-day advance</p>

<p>notice before the launch of a Start Date Sunrise may help mitigate the administrative burdens on the trademark owners.</p>		
<p>Q5(a)(ii): <i>Does the ability of Registry Operators to expand their Sunrise Periods create uniformity concerns that should be addressed by this WG?</i></p> <p>Proposed Answer: The Sub Team generally agreed that the ability of Registry Operators to expand their Sunrise Periods does not create uniformity concerns that should be addressed by this WG.</p>		
<p>Q5(a)(iii): <i>Are there any benefits observed when the Sunrise Period is extended beyond 30 days?</i></p> <p>Proposed Answer: The Sub Team generally agreed that there are benefits observed when the Sunrise Period is extended beyond 30 days, and noted that most Registry Operators have already run a 60-day End Date Sunrise. Extending beyond 30 days provides more time for trademark owners to decide whether to participate in the Sunrise Period.</p>

<p>Q5(a)(iv): <i>Are there any disadvantages?</i></p> <p>Proposed Answer: Some Sub Team members believe that there are disadvantages when the Sunrise Period is extended beyond 30 days, but the Sub Team did not come to a conclusion on this point.</p>		
QUESTION 5(b)		
Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q5(b): <i>In light of evidence gathered above, should the Sunrise Period continue to be mandatory or become optional?</i></p> <p>Proposed Answer: The Sub Team had widely diverging opinions on whether the Sunrise Period should continue to be mandatory or should become optional.</p>	<p>The Sunrise Sub Team recommends that the mandatory Sunrise Period should be maintained.</p>	
<p>Q5(b)(i): <i>Should the WG consider returning to the original recommendation from the IRT and STI of Sunrise Period OR Trademark Claims in light of other concerns, including freedom of expression and fair use?</i></p> <p>Proposed Answer: The Sub Team considered</p>

<p>Q5(b)(ii): <i>In considering mandatory vs optional, should Registry Operators be allowed to choose between Sunrise and Claims (that is, make ONE mandatory)?</i></p> <p>Proposed Answer: The Sub Team considered this question but did not reach a conclusion.</p>		
QUESTION 6		
Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q6(a): <i>What are Sunrise Dispute Resolution Policies (SDRPs), and are any changes needed?</i></p> <p>Proposed Answer: The Sub Team noted that SDRPs are explained in the Section 6.2.2 and 6.2.4 of Module 5 of the Applicant Guidebook.</p> <p>The Sub Team generally recognized that it is not within the scope of the RPM PDP WG to recommend changes to any Registry Operator specific SDRPs. The Sub Team had widely diverging opinions on whether any changes,</p>	<p>The SubTeam recommends that the next Applicant Guidebook be amended as follows:</p> <ol style="list-style-type: none"> 1. We recommend: the new version of the AGB should include the TMCH dispute resolution procedure for challenging the validity of trademark records entered into the TMCH. <p>deletions, or additions to the mandatory grounds are needed.</p> <p>--</p> <p>According to the Section 6.2.2 and 6.2.4 of the Trademark Clearinghouse Model of Module 5 of the Applicant Guidebook, SDRP is a mechanism that a Registry Operator must provide to resolve disputes regarding its registration of Sunrise Registrations. It allows challenges to Sunrise Registrations related to Registry Operator’s Allocation and registration policies, on four non-exhaustive grounds, including on the grounds that the domain name that was registered does not identically match the Trademark Record on which the Sunrise-Eligible Rights Holder based its Sunrise Registration. In the time between when the AGB was written and the TMCH requirements were established, the TMCH dispute procedure was created. This procedure allows for challenges to the recordal of marks in the TMCH that underlie Sunrise Registrations. As a result two of AGB requirements for Registry Operator SDRPs are moot; and in any event the registry operator is not the best-placed party to adjudicate these challenges due to the fact that the</p>	<p>procedure a requirement for the TMCH Provider.</p> <ol style="list-style-type: none"> 2. We recommend: What is current AGB (Module 5) Trademark Clearinghouse Model, section 6.2.4 be amended to remove (i) and (iii). 3. We recommend: The AGB (Module 5) 6.2.4 be amended to include 6.2.6 – the Registry Operator will, upon receipt from the TMCH of a finding that a sunrise registration was based upon an invalid TMCH record (pursuant to a TMCH dispute resolution procedure), immediately cancel the domain name registration. <p>Note: Registry Operators should continue to have the option to offer a broader SDRP to include optional/additional Sunrise criteria as desired.</p>

<p>registry operator is reliant on trademark eligibility information provided to it by the TMCH. We propose a resolution that codifies the current practice, with no changes.</p>		
<p>Q6(b): <i>Are SDRPs serving the purpose(s) for which they were created?</i></p> <p>Proposed Answer: The Sub Team had widely diverging opinions on whether SDRPs are serving the purpose(s) for which they were created.</p> <p>--</p> <p>The Sub Team had difficulty determining whether SDRPs are serving the purpose(s) for which they were created, as each TLD has its own SDRP and there is hardly any data or analysis of the SDRP decisions across all new gTLD. Some sub team members have proposed a solution in Q6(a) that will eliminate the non-functional parts of the SDRP requirements and codify the current practice. Some Sub Team members believe that, in general, SDRPs do not seem to serve the purpose(s) for which they were created. QUESTION 7		
Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q7(a): <i>Can SMD files be used for Sunrise Period registrations after they have been canceled or revoked?</i></p> <p>Proposed Answer: The Sub Team noted that after a SMD file or its underlying trademark record has been canceled or revoked, the SMD file cannot be used for Sunrise Period registrations. However, theoretically, an SMD file might still work for an asynchronous short period of time due to the registry process.</p>		
<p>Q7(b): <i>How prevalent is this as a problem?</i></p> <p>Proposed Answer: The Sub Team generally agreed that the problem does not seem to be prevalent.</p>

Proposed Answer	Preliminary Recommendation	Proposed Question for Community Input
<p>Q8(a): Are Limited Registration Periods in need of review vis a vis the Sunrise Period? Approved Launch Programs? Qualified Launch Programs?</p> <p>Proposed Answer: The Sub Team discussed this question but was unable to conclude whether the Limited Registration Periods, Approved Launch Programs, or Qualified Launch Programs are in need of review.</p>		<p>Kristine Dorrain and Maxim Alzoba provided suggested language for proposed questions via this Google Doc (c/p below): https://docs.google.com/document/d/1Y-ld2R-JNL1Ra9KPKpTjLGjaZvjrIFDscsuMMic_OO4/edit?usp=sharing.</p> <p>The RPMs WG has received limited feedback that the rules for ALP and QLP do not integrate smoothly with the concept of Sunrise.³ Notably, many registry operators did not use the ALP or QLP options and only a few used LRP. In order to make a recommendation on this question, we are seeking the following guidance from registry operators.</p>
<p>Q8(b): Are the ALP and QLP periods in need of review?</p> <p>Proposed Answer: The Sub Team discussed this question but was unable to conclude whether ALP and QLP periods are in need of review.</p>		<p>1. If a registry operator did not attempt an ALP, QLP, or LRP, was the reason for not taking advantage of those programs</p>
<p>Q8(c): What aspects of the LRP are in need of review?</p>		

³ For instance, some GEO TLDs struggled to ensure that words needed for operation of their TLD (ie. required by the governments that approved them) were all able to be allocated or reserved for later registration before sunrise. These words may have been recorded in the TMCH, but needed to be reserved to the governments (one example is “police” which is both a word for local law enforcement and a band. [STAFF NOTE: “THE POLICE” is a registered trademark for the band])

Were you able to achieve your goals in a different way (such as by combining any or all of these)?</p> <p>2. If a registry operator did attempt an ALP, QLP, or LRP (or combination) but didn't successfully <u>use</u> any, was the reason you did not take advantage of those programs related to how they integrate with sunrise? Were you able to achieve your goals in a different way?⁴</p> <p>3. If a registry operator used a ALP, QLP, or LRP (or combination), did you experience any unanticipated trouble with integrating the sunrise period into your launch? Specifically, were you able to allocate all of the names you needed to allocate under those programs before the Sunrise Period?</p>

⁴ For instance, some registry operators may have used the QLP 100 (RA 3.2) (plus IDN variants) in combination with registry-reserved names to obtain the names they needed. Did you do this? If so, were you able to reserve or allocate all the names you needed to?

		<p>4. For each issue you identify above, please also include a suggested mitigation path. What do you suggest the WG consider to help alleviate the pain points and make those programs more useful and functional, while still respecting the trademark protection goals of the Sunrise program? How important is it to make changes to these programs before another round (that is, are these issues worth “holding up” another round for, or are the work-arounds tolerable)?</p> <p>5. For non-registry operators, did you experience struggles with the way ALP, QLP, or LRPs (or a combination) integrated with Sunrise, either as registrar, as a brand owner, or as a domain name registrant?</p>

<p>Q12(b): <i>Should there be a different rule for some registries, such as certain types of specialized gTLDs (e.g. community or geo TLDs), based on their published registration/eligibility policies? (Examples include POLICE.PARIS and POLICE.NYC for geo-TLDs , and WINDOWS.CONSTRUCTION for specialized gTLDs)</i></p> <p>Proposed Answer: The Sub Team discussed this question but was unable to conclude whether there should be a different rule for some registries, such as certain types of specialized gTLDs, based on their published registration/eligibility policies.</p>		<p>The RPMs WG has received information that the 2012 Applicant Guidebook did not foresee that some TLDs (specifically GeoTLDs, but perhaps others) might need more than 100 domain names to allocate prior to the launch of the TLD and prior to sunrise. For GeoTLDs, one example is the potential need to register city/county/office/official/etc. websites in advance of Sunrise (e.g. the business of the TLD may make it critical that POLICE.[geo] is allocated to the police department, not to the band). We have limited information about the impact of this situation and do not know how many (and to what extent) registry operators were affected.</p> <ol style="list-style-type: none"> 1. If a registry operator had/has a business model that was in some way restrained by the 100-name limit for names registries can reserve under RA 3.2, please share your experience and

		<p>suggested path to improvement. What was your work-around, if any?⁵</p> <p>2. If the WG were to identify this as a key concern that required changes to way the sunrise period operates, are there other TLDs, besides GeoTLDs that did or will encounter the same problem? What suggestions do you have for work-arounds or solutions that will not diminish the protections available from the Sunrise Period (balanced with the need to finish this work in a timely manner)?</p> <p>3. Did any registry operators intend⁶ to offer a special sunrise before the regular Sunrise that targeted local trademark owners?⁷ If so, would you have validated the marks in some way? How would you have resolved conflicts between trademark holders that got their domains</p>

⁵ For instance, if you withheld names from registration (“reserved” names), how well did that work?.

⁶ Prior to the implementation of Sunrise rules in the original AGB.

⁷ For instance, would the ability to offer a special “pre-sunrise” sunrise solve any problems?
