

RECOMMENDATION 19

#	Comment	Contributor	EPDP Response / Action Taken
---	---------	-------------	------------------------------

The EPDP Team recommends that for the new policy on gTLD registration data, the requirements of the Temporary Specification are maintained in relation to the Transfer Policy until such time these are superseded by recommendations that may come out of the Transfer Policy review that is being undertaken by the GNSO Council.

Support recommendation as written

3	<p>This change is probably necessary in order to reconcile EPDP recommendations with arrangements with existing UDRP providers.</p> <p>ICANN Org may also need to enter into data processing agreements with dispute resolution providers to limit the publication of personal and sensitive information about registrants in UDRP and URS decisions. Such data may include the names and contact information of registrants and their attorneys, and the names and contact data of complainant attorneys. Publication of identity, organization, and other data of the registrant and its attorneys -- including in dispute proceedings where the registrant won -- is a collection activity and publication of personal and sensitive data that may well be in violation of the GDPR. The UDRP and URS decision, and even the transfer of domain names, does not require such public disclosure as a necessary part of technical implementation. We further note that older UDRP and URS cases may need to be redacted for publication of personal and sensitive data of the registrant and his/her/its attorneys, email addresses, and other data.</p>	<p>Farzaneh Badii; Internet Governance Project</p> <p>This recommendation handles appropriately an interdependence between the Temporary Specification and the Transfer policy.</p>	<p>Support</p> <p>EPDP Response:</p> <p>Action Taken:</p> <p>[COMPLETED / NOT COMPLETED] – [Instruction of what was done.]</p>

Intent and wording of this recommendation requires amendment			
4	<p>Under the Temp Spec, if the Gaining Registrar is unable to gain access to then-current Registration Data for a domain name subject of a transfer, the Gaining Registrar is no longer required to obtain a Form of Authorization from the Transfer Contact. This weakened protections against hijackings. Instead: any registrar with an auth_info code MUST be able to obtain the registrant contact data via EPP from the registry. That is GDPR-compliant, because the registrant has given the gaining registrar permission to access the data. The GNSO Council needs to move this along, and the GDPR is a good spur.</p>	<p>Greg Aaron; iThreat Cyber Group</p>	<p>Concerns</p> <p>EPDP Response:</p> <p>Action Taken:</p> <p>[COMPLETED / NOT COMPLETED] – [Instruction of what was done.]</p>
