

# ICANN Stakeholder Tool

Dev Anand Teelucksingh, At-Large member, LACRALO

Trinidad and Tobago Computer Society | 18 February 2019

**ICANN** 64  
COMMUNITY FORUM  
**KOBE**  
9-14 March 2019

The [At-Large Outreach and Engagement WG](#) was looking at ways to do more effective outreach, such as :

- Analysis of the Fellows that have passed through the Fellowship can yield persons that could be potential members of At-Large.
- How do we know where to target outreach? Where were our gaps ?
- the ALAC and ccNSO discussing ways in which ccTLDs and At-Large members, how could anyone discover each other?
- For places that didn't have an At-Large presence, could other ICANN stakeholders from that country be contacted? Who were those Stakeholders? Membership information about other stakeholder groups were listed on separate pages in different ways which was difficult to find and sort.

# Stakeholder Tool

To overcome these challenges, led to what I've called the ICANN Stakeholder Tool which allows you, in one location to identify :

- Who are our stakeholders in a country AND in a region
- What are the gaps in stakeholder representation in a country AND in a region.

# Stakeholder Tool

Currently, the tool tracks, by country and by region

- At-Large Representation (At-Large Structures and Individuals)
- Country code Name Supporting Organisation (ccNSO) membership
- Governmental Advisory Committee (GAC) Membership
- NCSG (Non-Commercial Stakeholder Group)
  - a. Non Commercial Users Constituency (NCUC) Members (Persons & Organisations)
  - b. Not-for-Profit Operational Concerns (NPOC) member organisations
- Commercial Stakeholder Group
  - a. Internet Service Providers and Connectivity Providers Constituency (ISPCP)
  - b. Business Constituency (BC) member organisations
- The Number of Fellowships, including a breakdown of the unique number of fellows and the number of meetings they attended as a fellow
- Nextgen Students
- Registrars Stakeholder Group
- Accredited Registrars

# Stakeholder Tool & Key Features

This tool works by collating as much as possible information from AC and SO's websites directly into the tool, meaning less manual reentering of information.

Some of the other challenges to note :

- Different AC and SOs in ICANN use different names for the same country and territory which made comparisons very difficult. The tool tries to take these differences into account
- As of February 2019, the Intellectual Property Constituency (IPC) and the Registrar Stakeholder Group (RrSG) don't list the country where their members are from.
- Fellowship and Nextgen continue to be published on separate pages so these are still manually added to the tool.

# Stakeholder Tool

A lot of time and effort has been put by me with any formal assistance over the past two years in refining this tool which helps the At-Large Community but which can also help ICANN and its multistakeholder community better understand its strengths and weaknesses.

The direct link to the Stakeholder Analysis Tool

<http://bitly.com/ICANNST>

At-Large Wiki page on the Stakeholder Tool

<http://bitly.com/ICANN-Stakeholder-Tool>
