Notice of acceptance must include rationale, etc. as set forth in 2.2ciA. Then the GNSO will need to determine the process that it would follow to become a Supporting Decisional Participant if it receives notice of a petition from another DP.</p> <p>The GNSO will also need processes to identify its representative for the purpose of the petition to act as a liaison</p>	<p>Staff to develop template for motion as well as template for Rejection Action Supporting Petition.</p> <p>Staff (to work with DT, if applicable) to develop proposed processes to identify its representative for the purpose of the petition to act as a liaison and how it will provide direction to that person.</p> <p>It is expected that this process would fall under the GNSO’s existing processes and practices.</p>

<p>2.3(f) ICANN and any SO or AC may deliver to the EC Administration in writing its views and questions on the Rejection Action Supported Petition prior to the convening of and during the Rejection Action Community Forum.</p>	<p>EC will need to decide on A process for receiving and processing submissions; however, this section is not about GNSO participation in the EC, it is about how the GNSO will develop its inputs (views and questions) for consideration at the Community Forum. Once that process is agreed, then whatever is produced is sent for information and posting.</p> <p>GNSO will use existing practices and processes for collecting views and questions.</p>	<p>Staff to develop template for motion.</p> <p>Staff (to work with DT, if applicable) on proposed process for how the GNSO will develop its inputs (views and questions) for consideration at the Community Forum. 6. Developing Input to the Rejection Action Community Forum

Per the GNSO Operating Procedures, the GNSO Council may initiate a GNSO Input Process (GIP) per ANNEX 3 of the GNSO Operating Procedures to provide input to the EC Administration for the Rejection Action Community Forum. See: <https://gns0.icann.org/en/council/annex-3-input-process-manual-18jun18-en.pdf>. Specifically:

“A GIP is the process through which the GNSO provides input on matters that may not involve gTLD policy, for example in response to a request from the ICANN Board or in response to a public comment forum as further described in this GIP Manual. Any such requests should include as much information as possible.

“A GIP may be initiated by the GNSO Council at any time it considers appropriate, for example, when a request for GNSO input is received from the ICANN Board or other entity that does not involve the creation of new obligations for ICANN contracted parties and does not relate to a topic otherwise suitable for a GNSO Policy Development Process or GNSO Guidance Process, for example providing GNSO Input to a public comment forum.”

Per these procedures, once the GIP is completed the Council will consider whether to approve the GIP recommendations, noting the following:

“Approval of the GIP recommendations submitted to the Council does not require a Council vote, except in the case where one or more GNSO Council members object to the adoption of the report. In such an instance, the GIP recommendations may be adopted only by the default threshold to pass a GNSO Council motion (a simple majority vote of each House), as set forth at Article X, Section 3-9 of the ICANN Bylaws. The outcome of the vote should be recorded and provided together with the results of the GIP to the entity that initially requested the input.”

In addition, “The GNSO Council shall transmit the results of a GIP, including any recommendations adopted by the GNSO Council, to the entity that originally requested the input as soon as practicable following the Council’s decision pursuant to Section 8 above.”

The GNSO EC Representative shall deliver the input to the EC Administration and ICANN Secretary.
