07:45-08:15 Portopia - Breakfast Room	At-Large Social Media Working Group (SMWG) Breakfast Tweet Up 2: At-Large Day	EE (HU TBC)		

<p>08:30-10:15 Topaz</p>	<p>At-Large Leadership Policy Workshop 1: Subsequent Procedures: Objectives for the At-large Community</p> <p>Adobe Connect: https://participate.icann.org/kix64-topaz</p> <p>Agenda:</p> <p><i>Subsequent Procedures: Objectives for the At-large Community:</i> One significant blemish on the new gTLD program, from the perspective of end users, was the failure of both the Community Priority Evaluation (CPE) process and the Applicant Support Programs. Few can judge these programs as anything but a complete failure. Given the At-large objective to see more applications from underserved regions and communities, this session is a brainstorm on how to promote better participation by these groups. What suggestions from the Subsequent Procedures interim reports seem workable to encourage such participation and which seem designed for them to once again fail. Is the timing of specific rounds something that can play a role in encouraging more participation? Would a BRAND round conflict with a community round?</p>	<p>Moderator: Jonathan Zuck, CPWG Co-Chair</p> <p>Lead: HU</p> <p>Notes: EE</p> <p>RP: YN</p>

<p>10:30-12:00 Topaz</p>	<p>At-Large Leadership Policy Workshop 2: Balancing privacy with security and stability for the Internet end user</p> <p>Adobe Connect: https://participate.icann.org/kix64-topaz</p> <p>Agenda:</p> <p><i>Balancing privacy with security and stability for the Internet end user,</i> GDPR (and other privacy regulation around the world) has led to a renewed focus on the intersection between registrant privacy and the benefits to end users from a more open system of DNS data including limitations on spam, phishing and malware and enhanced law enforcement and consumer protection. In this session, we will attempt to explore this friction in some depth and the tradeoffs we should and shouldn't accept.</p>	<p>Moderator: Jonathan Zuck, CPWG Co-Chair</p> <p>Lead: EE</p> <p>Notes: HU</p> <p>RP: YN</p>
