REMINDER: Implementation Operations team interactive update on the ‘Enhancing ICANN’s Multistakeholder Model (MSM)’ Project

In 2019, the ICANN Board initiated a project aimed at enhancing the effectiveness of ICANN's multistakeholder model – one of the strategic objectives outlined in ICANN's Strategic Plan for Fiscal Years (FY) 2021-2025. This effort is critical to ensuring that the multistakeholder model is able to evolve and meet the ever-changing needs of ICANN's global community.

The Implementation Operations team is offering an up to 30 min interactive update on this project, more specifically on the evaluation methodology, which is used to assess the current projects/initiatives that are supporting the MSM.

If you like this update to be part of your constituency/committee ICANN75 agenda, please email giovanni.seppia@icann.org and/or negar.farzinnia@icann.org. We look forward to working together on enhancing ICANN's MSM.

Visualizing the management of DNSSEC keys based on published records has recently been accomplished, this report covers the basics and discusses, without naming specific operators, some specific TLD use cases.
