

# Oversight

---

In **business, oversight** of a system or process is the responsibility for making sure that it works efficiently and correctly.

LAW, GOVERNMENT, MANAGEMENT systems or actions to control an activity and make sure that it is done correctly and legally

Group Peter: Assumption that oversight process would develop parallel to delegation and transfer process. Board as an oversight entity

## Open issues

**What is the purpose of oversight and what does it mean**

**What needs to be done**

**What is discretionary room for decisions by IFO**

## Sequence of decision

### **Board as an oversight entity**

Assumption that oversight process would develop parallel to delegation and transfer process.

Board as an oversight entity

Observation: the more the ICANN Board is involved in the operations, the lesser it is available for oversight

Disadvantages of having ICANN Board involved: responsibility of IFO. Board decisions can be harder un-done than PTI decisions.

### **ICANN Board is Backstop**

**When would oversights happen?**

**5 year or 10-year timeline**

**Who takes a decision?**

**ICANN Board**

**Decision subject to review?**

**IFO denied time extension, or lesser extension than requested**

**Any request by ccTLD manager could be subject to review**

**Discretionary decisions by IFO**

**Transparency**

**Material should not, but decisions should**

Any piece of communication between ccTLD and IFO: should not be public record. But the decisions should be
