

Evolving the ICANN Multistakeholder Model

ALAC CPWG DISCUSSION

9 MAY 2019

-
- ICANN Board posed a question to the ICANN community at ICANN63:
 - How can our multistakeholder model be made more effective without compromising our bottom-up and inclusive decision-making process?
 - During the ICANN64 meeting, the community identified issues that are preventing the multistakeholder model from functioning more effectively and efficiently.

Issues 1 – 6: Slide 1/3

ISSUE 1: Timing of decision-making: Our processes take too long

ISSUE 2: Complexity

ISSUE 3: Culture

ISSUE 4: Prioritization of work

ISSUE 5: Demographics
