Meetings Programme Committee | ccNSO

Draft Suggestions

27 June 2019 | ICANN65 Marrakech

Session Agenda

- Icebreakers: Test & ideas
- Review MPC suggestions, share and discuss additional ideas
- Test out polling tools

Meridian Institute
Connecting People to Solve Problems

Icebreaker

- In groups of 4-5 people, come up with a list of things you **all** have in common.

- The group with the longest list wins.

- Remote participants engage as a virtual group among themselves and report back at the end.
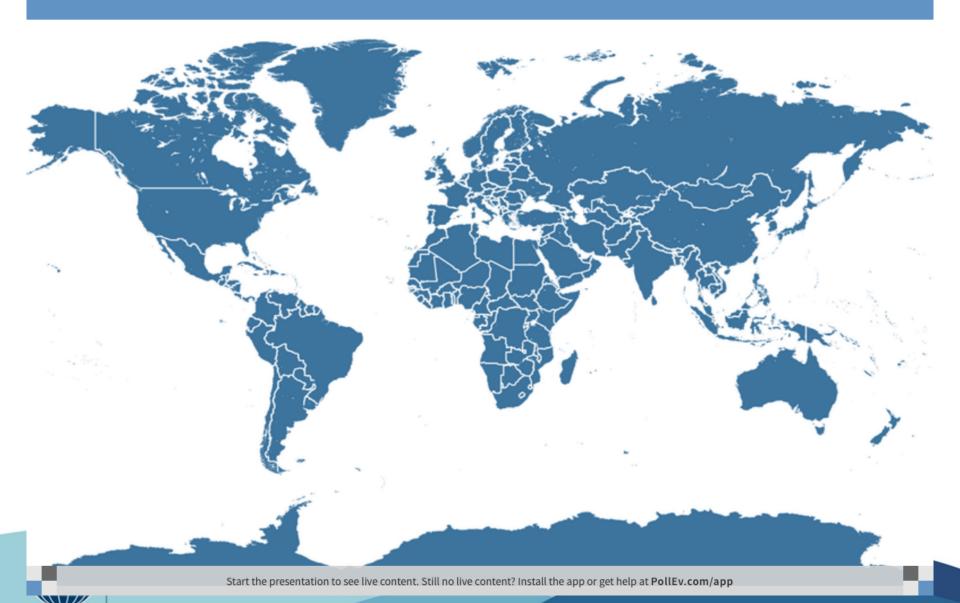

- Time available: 5 minutes

Poll Everywhere

- Please visit this link and keep open throughout meeting: https://pollev.com/meridian

What country do you live in?

How are you feeling today?

Additional Icebreaker Ideas

- Line up alphabetically by ccTLD name
- Line up by number of years as a ccNSO member
- Find a partner near you (ideally not your colleague or friend) and ask each other:
  - "If you could know the answer to one thing, what would it be?"
  - "What is your most memorable experience from the ccNSO or as a ccTLD manager?"
  - "What is one question you would like to ask…[an astronaut, your favorite author/artist, the top expert in your field]?"

DRAFT SUGGESTIONS

Selections Relevant for MPC

Ideas for MPC | Inputs

- Offer 15-minutes of rapid-fire Q&A sessions to allow people to raise topics of interest or questions they may have that could spark a conversation following the meeting.

- Use mailing list to poll/collect expressions of interest on topics affecting ccTLDs and orient part of the Members' Day meetings to address those high-interest and timely topics.

- Use polling software to collect ideas, feedback, generate discussion (beyond the color cards for gauging temperature of the room), which may help to engage people more actively.

Meridian Institute
Connecting People to Solve Problems

Ideas for MPC | Example Qs

MPC prepares a 2-question survey to inform next Members Day meeting sessions. For example:

- For each ccNSO Work Group/Committee Chair/Co-Chair:
  - What is the biggest issue your WG/C is facing right now?
  - What input would be helpful from the ccTLD community to help you address it?

- For all ccNSO members:
  - What is the biggest question/challenge your ccTLD is facing right now?
  - What information would be helpful from the ccTLD community to help you address it?
  - What is THE MOST timely/important issue for the members to discuss at the subsequent meeting?

Ideas for MPC | Program Ideas

- For the third meeting of the year, reserve the second ccNSO Members' Day meeting for different programming such as:
    - Cross-community sessions. For instance, ccNSO-hosted workshops for GNSO colleagues to learn about policies and legal initiatives used by ccTLDs that could inform best practices for gTLDs
    - Use a similar format to Tech Day but for Policy, Legal, or Communications discussions, which are also important topics for ccTLDs to exchange knowledge, perhaps informed by a poll in advance of planning for Tech Day to collect community input on timely topics for discussion.

Ideas for MPC | Capacity Building

Continuing Purpose – Community of Practice & Knowledge Exchange

- Capacity building and training for newer, lesser-developed, and/or smaller ccTLDs was also identified as a key role the ccNSO could expand upon. Specifically, this could include:
  - Using meeting time for participatory exchange in addition to the conference-format presentations and discussion. For example, the capacity building sessions at the ccNSO Meeting at ICANN47 in Durban, 2013.

Reverse-Engineering Design

Define Goal/Objective of session, then consider process options to achieve it.

| Info Sharing	Collect Input	Build Agreement	Relationship-building
• Small groups • Presentations • Mailing List/Newsletter	• Small group discussion & report outs • Temperature • Poll/Survey	• WG/Cmte • Poll priorities • Shared understanding of problem/ solutions	• Team-building • Social gathering • Icebreakers

What meeting format ideas are you most interested to try? (Add ideas & vote on top ones)

Top

In 1-2 words, how would you describe the ccNSO community?

Thank You
