

Draft – Proposed Implementation of the GNSO Policy for the Protection of IGO and INGO Identifiers in All gTLDs

1. Scope

This Consensus Policy covers Generic Names Supporting Organization (GNSO) policy recommendations adopted by the ICANN Board on 30 April 2014 concerning protection for certain names of the Red Cross, International Olympic Committee (IOC), International Governmental Organizations (IGOs), and International Non-Government Organizations (INGOs) which are not inconsistent with advice from the Governmental Advisory Committee (GAC) to the ICANN Board.

2. Effective Date

This Policy is effective for all gTLD Registry Operators and ICANN-accredited Registrars on 1 February 2018.

3. Definitions. For purposes of this Policy, the following definitions will apply:

3.1. Reservation. All gTLD Registry Operators MUST either withhold from registration or allocate to Registry Operator the second-level domain names corresponding to all identifiers recorded on the Red Cross, IOC and IGO Identifier List found here:

3.2. INGO Claims Notification means a notice containing the information of the relevant INGO, which is displayed by the Registrar to a potential domain name registrant attempting to register a domain name that is an exact match of a name on the INGO Identifier List.

3.3. INGO Claims Service refers to a process by which a domain name registrant and the relevant INGO are notified that the domain name being registered is an exact match of the INGO's name on the INGO Identifier List.

3.4. INGO Claims System refers to a database of DNS labels corresponding to the INGO Identifier List.

- 3.5. INGO Identifier List** refers to a list containing second level, exact match, full names of protected INGOs and their corresponding DNS labels that are permitted to participate in the 90-day INGO Claims Notification process.
- 3.6. Red Cross, IOC and IGO Identifier List** refers to a list containing second level, exact match, full names of protected Red Cross and IOC organizations, IGOs and their corresponding DNS labels designated to receive certain protection under this policy.
- 3.7.** The key words "MUST", "MUST NOT", "SHOULD", "SHOULD NOT", and "MAY" in this document are to be interpreted as described in RFC 2119, which is available at <http://www.ietf.org/rfc/rfc2119.txt>.

4. Red Cross, IOC and IGO Full Name Reservation at the Second-Level

- 4.1. Reservation.** All gTLD Registry Operators MUST either withhold from registration or allocate to Registry Operator the second-level domain names corresponding to all identifiers recorded on the Red Cross, IOC and IGO Identifier List found here:
<https://community.icann.org/display/IIPIRT/Red+Cross%2C+IOC+and+IGO+Identifier+List+--+Draft+Page+for+IRT+Use+Only>, unless otherwise specified.¹
- 4.2. Existing Registrations in gTLDs.** If a domain name, containing an exact match name from the Red Cross, IOC, and IGO Identifier List, is registered before this Consensus Policy effective date or before the label is added to the Red Cross, IOC and IGO Identifier List, the Registry Operator MUST permit renewal or transfer of the domain name. If a domain name, containing an exact match name from the Red Cross, IOC and IGO Identifier List, is registered before the label is added to the Red Cross, IOC and IGO Identifier List, and is subsequently deleted, the Registry Operator MUST withhold the domain name from registration or allocate the domain name to Registry Operator.

¹ Please note that the current URL (link) to the Red Cross, IOC and IGO Identifier List will be replaced with a permanent URL (link) on ICANN's Registry homepage.

4.3. Registration by Red Cross, IOC and IGO Organizations. Red Cross, IOC and IGO organizations MAY request registration of domain names matching their identifiers otherwise withheld from registration at the second-level under this Policy. Registry Operators and Registrars MUST provide a method for registration of the reserved names by Red Cross, IOC and IGO organizations.²

4.4. Red Cross, IOC and IGO Identifier List Changes: Names may be added to or deleted from the Red Cross, IOC and IGO Identifier List upon ten (10) calendar days notice from ICANN to Registry Operator. ICANN will consult with the GAC in relation to proposed changes to the names on the Red Cross, IOC and IGO Identifier List.

5. INGO Claims Services at the Second-Level

5.1. Scope. The INGO Claims Service only applies to gTLDs delegated after this Consensus Policy effective date. Registry Operators and Registrars MUST provide the INGO Claims Services, as described in section 5.2, for INGO names of exact match on the [INGO Identifier List](#). The INGO identifier names and DNS labels on the [INGO Identifier List](#) are listed here:

<https://community.icann.org/display/IIPIRT/INGO+Identifier+List+-+Draft+Page+for+IRT+Use+Only>³

5.2. INGO Claims Service

5.2.1. Registry Operator MUST provide the INGO Claims Service for the first ninety (90) calendar days for which the domain name is available for registration.

5.2.2. During the registration process, prior to the execution of the registration, the Registrar MUST notify the potential registrant that the name requested for registration is an exact match of a name on the INGO Identifier List and

² Registrations in the TLD remain subject to Registry Operator's registration restrictions, including community-based eligibility requirements and Public Interest Commitments.

³ Please note that the current URL (link) to the INGO Identifier List will be replaced with a permanent URL (link) on ICANN's Registry homepage.

that the name MAY be subject to ICANN's IGO/INGO Identifiers Protection Policy.

- 5.2.3.** Registrars MUST clearly and conspicuously display the INGO Claims Notification, containing the claims notice information, to the potential domain name registrant and inquire as to whether the potential domain name registrant wishes to continue with the registration.
- 5.2.4.** The INGO Claims Notification MUST be provided by the Registrar at the time of potential registration in real time, without cost to the prospective domain name registrant, and MUST be in the form specified in the INGO Claims Notification in Appendix A.
- 5.2.5.** The INGO Claims Notification MUST require an affirmative confirmation by the potential domain name registrant to continue with the registration (i.e. acceptance box MUST NOT be pre-checked).
- 5.2.6.** The INGO Claims Notification MUST be provided by the Registrar to the potential domain name registrant in English and SHOULD be provided by the Registrar to the potential domain name registrant in the language of the registration agreement.
- 5.2.7.** Upon registration, the Registry Operator MUST provide a notification in the INGO Claims System that the name in the INGO Claims System has been registered. The INGO Claims System then generates a notice to the relevant INGO that their name has been registered. The notification MUST be in accordance with the INGO Notification of Registered Name in Appendix B.

5.3. INGO Identifier List Changes. Names may be added to or deleted from the INGO Identifier List upon ten (10) calendar days notice from ICANN to Registry Operators and Registrars. ICANN will consult with the United Nations Department of Economic and Social Affairs about proposed changes to INGO names on the INGO Identifier List.

Appendices

Appendix A: INGO Claims Notification displayed to Potential Domain Name Registrant

[Must be provided, at a minimum, in English and SHOULD be provided in the language of the registration agreement]

You have received this INGO (international non-governmental organization) Claims Notification because you have applied for a domain name, which is an exact match with at least one INGO name on the INGO Identifier List.

You may or may not be entitled to register the domain name depending on your intended use and whether it is the same or significantly overlaps with the records listed below.

Please read the information below carefully. If you have questions, you may want to consult an attorney or legal expert for guidance.

If you continue with this registration, you represent that you have received and you understand this notice and to the best of your knowledge, your registration and use of the requested domain name will not infringe on any legal rights that the INGO may have in its name. The following [number] of records are listed on the INGO Claims List:

INGO Official Name: <claimINGO:name>
INGO English Name: <claimINGO:englishName>
INGO URL: <claimINGO:url>
INGO Address: <claimINGO:addr>
INGO Phone: <claimINGO:voice>
INGO Fax: <claimINGO:fax>
INGO Email: <claimINGO:email>

INGO Official Name: <INGO:name>
INGO English Name: <INGO:englishName>
INGO URL: <INGO:url>
INGO Address: <INGO:addr>
INGO Phone: <INGO:voice>
INGO Fax: <INGO:fax>

INGO Email: <INGO:email>

Appendix B: INGO Notice of Registered Name sent to Protected Organization

Dear <tmpl_var name="user_name">,</tmpl_var>

You have received this Notice of Registered Name because the following domain name(s) matches your INGO record(s) on the INGO Identifier List and have been registered during the first 90 days the domain name was available for registration.

<tmpl_loop name="body">

<tmpl_var name="mark_name"> (<tmpl_var name="mark_handle">) : <tmpl_var name="idn"> <tmpl_if name="domain_name">(<tmpl_var name="domain_name">)</tmpl_if> <tmpl_var name="reg_date">

</tmpl_loop>

Note: In certain circumstances, one or more of these domain names may no longer be registered. A domain name can be deleted at any time. Additionally, a domain name that is deleted during the first five calendar days of registration becomes immediately available again for registration. You may receive multiple Notices of Registered Name under these or similar conditions.

For additional information, please refer to the Whois record for the domain name at the applicable registry. A list of gTLD registries and a link to their Whois is available at <http://www.icann.org/en/resources/registries/listing>.

If you encounter any issues, please do not hesitate to contact our customer support service provided to you by clicking on the "Support" button after signing in to the INGO Claims System web interface.

Implementation Notes

1. DNS Label Conversion Rules

Protected identifiers that do not conform to the framework of DNS permissible characters will be converted into DNS labels that contain only letters, digits and hyphens. Some names on the Red Cross, IOC, IGO, and INGO Identifiers Lists include alternative language characters used in the creation of Internationalized Domain Names as well as blanks or space characters that are impermissible in DNS labels. Thus, DNS label conversion rules were developed to convert these names into DNS permissible equivalent characters (e.g., the protected organization "Africa Unite" will be converted to "africa-unite" and "Olímpico" will be converted to "xn--olmpico-8ya"). The DNS also places restrictions on the length of the label. As a result, DNS labels will not be assigned to protected identifiers that exceed the number of permissible characters in a label (e.g. the length of the label for the protected organization "Chamber of Commerce, Industry and Production of the Argentine Republic" is longer than the maximum permitted length of 63 characters).

1.1. Matching of Red Cross, IOC, IGO, and INGO Identifiers to DNS labels. Protected identifiers will be converted into DNS labels for protection under section 1, 2 or 3 of this policy according to the following rules:

- 1.1.1.** Convert each identifier to a UTF-8 string, lowercase it, remove any starting or ending hyphens, and normalize it to Normalization Form C.⁴
- 1.1.2.** If the resulting string is a valid LDH⁵ DNS label,⁶ no further conversion is needed, the string is the resulting DNS label. If the string is composed exclusively of US-ASCII characters, two labels will be generated: (1) a label resulting from removing non-LDH characters; and (2) a label resulting from substituting any non-LDH character with a hyphen. In both cases, any cluster of two or more contiguous hyphens will be substituted by only one hyphen.

⁴ The Unicode Consortium, "Unicode Standard Annex #15: Unicode Normalization Forms", September 2009, <http://www.unicode.org/reports/tr15/>.

⁵ Letter Digit Hyphen. For more information, please refer to RFC 5890 section 2.3.1 (<https://tools.ietf.org/html/rfc5890>).

⁶ For more information, refer to RFC 1034 section 3.1.

1.1.3. If the string is a valid U-label,⁷ the DNS label will be the corresponding A-label.⁸

1.1.4. If the string is not composed exclusively of US-ASCII characters, two pre-labels will be generated: (1) a pre-label resulting from removing invalid IDNA2008 characters; and (2) a pre-label resulting from substituting any invalid IDNA2008 character with a hyphen. In both cases, any cluster of two or more contiguous hyphens will be substituted by only one hyphen and then converted to A-label form.

1.1.5. For any other case, or if the length of any label produced by this algorithm is not between 1 and 63, there will be no resulting DNS label.

2. Source of the INGO Identifier List

2.1. Names on the INGO Identifier List are provided by the United Nations Department of Economic and Social Affairs via the United Nations Economics and Social Council.⁹

Background

This Policy Development Process (PDP) was initiated to develop policy recommendations for the provision of protection for identifiers of certain IGOs and INGOs, including the Red Cross and the IOC.

This Consensus Policy covers policy recommendations adopted by the ICANN Board on 30 April 2014, which were not inconsistent with GAC Advice (please refer to: <https://www.icann.org/resources/board-material/resolutions-2014-04-30-en#2.a>). Outstanding recommendations which were inconsistent with GAC Advice will be covered once differences are reconciled between the ICANN Board, the GAC and the GNSO.

⁷ See RFC 5890.

⁸ See RFC 5890.

⁹ UNDESA is the United Nations Department of Economic and Social Affairs that manages the ECOSOC list (<https://www.un.org/ecosoc/en/home>) of INGOs (<https://www.un.org/development/desa/en/>).

The adopted recommendations relate to protection at the top and second level for specific Red Cross, IOC and IGO names (with an Exception Procedure to be designed for the relevant protected organizations), protection at the top level for specific INGO names and a 90-days Claims Notification process at the second level for certain other INGO names.

This Policy provides requirements for contracted parties with respect to second-level DNS labels. The adopted recommendations also relate to the delegation of gTLD strings. With respect to the delegation of gTLD strings, ICANN MUST reserve the gTLDs corresponding to the above-mentioned identifiers, until the gTLDs are applied for by the relevant protected organization.

At the time this Policy was implemented, some of the adopted [recommendations](#), [were inconsistent with GAC advice](#). Accordingly, the inconsistent recommendations will be implemented when the inconsistencies are reconciled between the ICANN Board, the GAC and the GNSO.
