take abor estheddags, For this survey, each contributes was asked to area the four mechanisms is notice of parference and also indicate. If any of the mechanisms should be estimated from their condensation in the initial repost. For exchange, the following number of points was ealizeded to each mechanism first citized e.g. search evaluation first citized: e.g. each collected in each mechanism first citized: e.g. each collected in each mechanism first citized: e.g. each evaluation first citized: e.g. each evaluation first citized in expensions, four this citized in each exchange first expension. Cells with value of error are highlighted in yellow on the psecadehest summaring results.

	Name	Type	Mech 1	Mech 2	Mech 3	Mech 4	Elimination	Criteria
1	I John Levine	Member	4	- 3		(Please eliminate 3 and 4. External entity has no support.	experience with grant making, and desire not to spend even more time and money on this one-time accident than we already have
							I know from experience that setting up a captive foundation would take another year, be very expensive, and leave ICANN with an expensive	
							useless appendage after we give the one-time auction money away.	
2	Alberto Soto	Participant Member	1	- 4	1 3	1 2	no 1) I would exclude total control by ICANN (Mechanism 1) as the	do not want more bureaucracy in ICANN, not the increase in personnel. If there is a need for more personnel, that is as small as possible or assigning double function.
3	Maureen Hilyard	Member	,	-	1 1	1 1	mechanism for the control, access and distribution of the funds gained	My choice focuses on the best interests of communities who would benefit most from the funds in order to achieve the mission of ICANN more effectively for end-users globally. Whi may require some necessary allocation that will enable ICANN Org to improve its technical reach to some of our underserved regions, there must be provision within the regulations of the communities of the communiti
							from the auction of domains. I believe that ICANN Org's current financial	committee, that constrain access by ICANN to a capped amount so that communities get more direct benefit from the funds that have been gained by the auction of domain names.
							situation does not put it in the best position to be making decisions about	9
							how best to use the funds for what I believed was initially to provide new	
							growth and development opportunities for global Internet users. While	
							we as a committee have spent months on this, we are all witness to the ICANN's increasing demands for volunteer support yet decreasing	
							opportunities to explore how they can more effectively carry out the	
							mission of ICANN within their communities, to ensure that its decisions	
							are better understood, and its mission outputs employed more	
							meaningfully and more effectively by global users of the Internet. Only by having an impartial but appropriate outside mechanism at least sharing	
							the organisational and administrative roles, and that the guidelines are	
							clearly specified about an appropriate cap on what ICANN Org could	
							possible use for themselves, can I feel that there would be a more	
							egalitarian approach to the distribution of the funding.	
4	Elliot Noss	Member	4				yes. three and four as they are most likely to lead to high expenses,	the community has great expertise and a great spirit to help. we have been responsible for this gift (excess funds) being generated and we wish to see it put to the best use possible
							institutionalize a "foundation" and to lead to outcomes detached from the	people and the Open Internet in the context of the ICANN mission.
5	Daniel Dardailler	Participant					community. Yes. 3. which would take too much time and create a liability when the	Mechanism 1 offers all the guarantees that the funding agency will be compliant to all the criteria laid out by the CCWG: expertise in mission/internet goodness compliance, global
1	Duriner Durdumer	i ui ticipuiit	1	1	,	`	funding stops? and 4, which would considerably complicate the	community involvement, transparency, accountability, quick to put in place, etc.
							compliance to mission relevance, transparency, accountability,	
6	Jon Nevett	Member		-			community participation, etc. eliminate mechanisms 1 & 3 ICANN shouldn't reinvent the wheel here.	Cost, efficiency, & effectiveness
7	7 Gnanajeyaraman Rajaram 8 Kavouss Aresteh	Participant Member	4	1	1 :		NO yes 4 too costly, too dependent	solicitation, implementation and evaluation ICANN internal get experience and work toward to transit to mech.1 in future
9	Yao Amevi Amessinou Sossou	Participant	4	(0	(I wish mechanism 1 is the sole mechanism to be promoted	The existence of an internal body inside the icann to implementing and issuing solution to the problems related to Internet governance and also documentation. This could necessitat
10	Carolina Caeiro	Member					I am OK with removing mechanism 4. However, I believe mechanism 3	efforts to raise funds to conduct specific take or missions. I would like to answer this question in light of my preferred choice. Mechanism 2 is my too choice because of the expertise and reach that would come from ICANN's partnership with
10	Cardina Caero	weinber	1	1 "	1 '		I am OK with removing mechanism 4. However, I believe mechanism 3 should be kept in the report for Barcelona to show the depth of our	I would like to answer this question in light of my preferred choice. Mechanism 2 is my top choice because of the expertise and reach that would come from ICANN's partnership wit multiple external organizations. I think this is a value added, and one that would best equip ICANN to deploy effective and efficient grant—making in the short-run.
		1		1			debate. My feeling is that many would think, given the task at hand, that	Distilling these points into specific criteria, I would say:
							a Foundation is mechanism that would make sense, so showing the	- Mechanism's ability to pool needed expertise on grant-making
							challenges that option would pose is a means to help the community understand our final recommendation (which will likely be mechanism 1	- Mechanism's ability to support quick and widespread deployment of grant opportunities
							or 2).	
11	1 Sébastien Bachollet	Member	4	- 1		(Yes 4 and 3	Cost of the mechanism
								Multistakeholder implication Fiduciary responsibility
								r-lourary responsionity Rossibility to close the mechanism when the money is totally distributed
								If we chose (it is not my fist choice) need to work with external organization(s), how we will select them?
12	Nadira Al-Araj	Participant	4	3	8	2	Yes, eliminate mechanism (3) because it takes a long time to make up an functioning.	The time to start managing the Auction Proceeds.
13	Seun Ojedeji	Member	- 4			-	I support eliminating 4, because of its setup complexity including cost and	I considered the following:
							more so because this will create yet another recurring overhead which	1. Simplicity in setup and shutdown when funds run out
							can become unsustainable, especially when the funds run out. There is also the administrative back and forth overhead involved since it's	Fulfilment of ICANN's oversight responsibility. Flexibility for instance, ability to achieve mechanism 2 exist in mechanism 1
							expected that ICANN leadership must exercise an oversight over the	5. Fiesburry for instance, ability to acrieve mechanism 2 exist in mechanism 1. A less ownerall overhead cost
							funds.	5. Continuity, visibility and sustainability of ICANN as an organisation
14	Judith Hellerstein	Participant	2	4	3		I support eliminating Mechanism 4. I think this mechanism would be too expensive to administer and take too much time to get it started.	The key criteria I had set forward were: 11 Transparency & accountability
							expensive to administer and take too much time to get it started.	1) iransparency & accountability 2) How costly would it be to administer
								3) Independence from ICANN
								allows another agency such as a DAFs to implement the process which would help ICANN meet its commitments to the board and to the community.
								Allows for stakeholders to be involved in advising on the grants and setting the criteria. I chose mechanism 2 because:
								I crose mecnanism z pecause: 1 Start up costs are minimal
								2) Provides some measure of independence without an over extensive cost involved in the start up and in the implementation.
15	Alan Greenberg	Member	4			(Eliminate 3 and 4. 3 will be expensive (\$ and other resources) and may not allow ICANN to be a funding applicant. 4 gives up too much control.	Minimize cost and complexity and maximize flexibility.
16	Hadia Elminiawi	Participant	4			- (I support eliminating 3 and 4. Set up time and cost are minimum if we	Cost, and alignment with mission and fiduciary requirements.
							are talking about mechanisms 1 and 2. I don't see any additional benefits	
							from mechanisms 3 and 4, they are more costly and add more restrictions (in case of mechanism 3, ICANN will not be able to apply for any of the	
							funds) and in case of 4 ICANN must still be involved to ensure that the	
							fiduciary responsibilities are met.	
17	7 Sylvia Cadena	Member	3	1 4		(I will support the elimination of the mechanisms 3 and 4 proposed. These 2 mechanisms will require at least another 12 to 18 months of work to	I think it is important for ICANN to recognize its strengths and weaknesses and to choose mechanism #2 will give ICANN the opportunity to learn about grant management, due dilig
		1					get established (if not longer) and the costs are quite unknown. It will be	The same state of the same sta
		1					better to focus on the selection between mechanism #1 and #2.	
	1	1	-				Yes. Mechanism 1. Its against the purpose and core mandate of ICANN.	ICANN Focus on core mandate. Possibility of different semi-independent Auction Proceeds management. Possibility of Fund raising without conflict with ICANN mandate. Possibility
18	Adetola Sogbesan	Participant						Transparency and Accountability
	Ī						Yes, I would eliminate 3 and 4	Setting up an entirely new foundation and the overhead of working with a separate organization would take away from the learning that ICANN should be getting from embarking onew use of auction proceeds.
	Adetola Sogbesan Mei Lin Fung	Participant Participant	3					
19	Mei Lin Fung	Participant Participant	1	4		3	No	Concern about creating new, complicated organisational structures that will take on a life of their own, as well as concern about finding and retaining sufficient expertise.
19 20 21	Mei Lin Fung Julf Helsingius Glen McKnight	Participant Participant Participant	1 2	4	1 2	1	No No	Concern about creating new, complicated organisational structures that will take on a life of their own, as well as concern about finding and retaining sufficient expertise. A arms length organization is important
