

UA EAI WG Meeting

25 February 2020

Attendees

Ben Bouck
Cheryl Langdon-Orr
Jorday Carey
Harish Chowdhary
Mark Svancarek
Nitin Walia
T Santosh
Pitinan Kooarmornpatana
Sarmad Hussain

Agenda

- 1) Reminders
 - a) Final reminder to fill out the [questionnaire](#) from the UA Comms WG
 - b) Final call for feedback to [how to deploy EAI support](#) presentation
- 2) Review of previous [meeting notes](#)
- 3) Up coming ICANN67 meeting
- 4) Continuation of [Best practices for email admins](#)

Reminders and meeting note review

The WG members were reminded to fill out the UA Comms WG questionnaire. They were also reminded to share feedback to the How to Deploy EAI material. The previous meeting notes were reviewed and no further suggestions or edits.

ICANN67 preparation

It was concluded from UA Coordination call to change the time of all UA sessions to be before noon, Cancun time. UA Measurement WG chair suggested they need not to hold the meeting during ICANN meeting virtually and the session could be cancelled. Therefore the request was submitted for three UA sessions; (1) Tech and EAI in Monday, (2) Local Initiatives and Ambassadors on Wednesday, and (3) Comms and Coordination on Thursday.

Best Practice for Email Administrator

The WG members continued working on the item 5.b.iii. The language to assign multiple aliases with caution was added and linked back to the criteria in item 5.b.ii where the decision based on the usability rather arbitrarily.

For item 6.a, it was revised to refer to the RFC for EAI standards. The standards required EAI to be in Unicode format. Therefore, a different method of representation e.g. Punycode should be avoided.

The GP members reviewed the list of pending discussion.

The additional rules around digits was added. When there are more than one digit sets being used in the same repertoire (set of possible codepoints used to create mailbox names), those digits should be mapped as variant codepoints. For example, a Hindi mailbox administrator may consider 'abc123' and 'abc१२३' as variant mailbox.

For the topic of Sign and Normalization, the chair would further review relevant information e.g. <http://www.unicode.org/Public/12.1.0/ucd/Scripts.txt>, <https://unicode.org/reports/tr15/> and plan the discussion.

The discussion of benefits or disadvantages of associating the UTF-8 mailbox name to an ASCII mailbox was planned for the next meeting.

Alternate meeting time

It was raised that the meeting time around 1500UTC works for most regions of the world. A doodle poll would be created to include these times. Depends on the voting result, the chair will decide on the updated meeting time.

Action items

No.	Action Item	Owner
1.	Review Best practices for email admins document for discussion	ALL
2.	Review Script.txt and Normalization document to plan the discussion	Mark S.
3.	Create Doodle Poll for the meeting times as discussed by the WG	Pitinan K.
