Meeting Agenda:

1. Welcome and Roll-call
2. Working on the SOW: Explainer Videos
3. AOB

Meeting Notes

The group detailed the Scenario 2 and 3. Followings are the additions on the SOW document.

What unfavorable experiences the end users come across with the Long New ASCII gTLDS, EAI, IDNs are mentioned. The fix depends on software, frameworks, libraries. Showing at least the related RFCs, such as RFC5895, and IDNA2008 might be necessary. However, for a short video, the solution can be defined at a higher level. All the relevant components are included in the UASG026 document.

All components in five criteria (Accept, Validate, Process, Store, Display) should be UA ready.

UASG has minimum code snippets (code samples).

Next meeting: 24 November 2021 UTC 1100-1200
