CPWG Charter and "Ideal" Process

Jonathan Zuck

CPWG Charter

- Position Development Body within At-Large
- Central Ingest Point for At-Large Discussions
- Non-"Policy" issues are forwarded elsewhere... ex. EXCOM, Finance Committee, etc.
- Issues are evaluated for relevancy to/remit of At-Large
- CPWG Facilitates
 - 1. "Position" Development
 - 2. Socialization/Feedback/Consensus Building within At-Large
 - 3. Workgroup Participation
 - 4. Drafting
 - 5. Action Determination (what's next? document, outreach, etc.)
- CPWG Makes Recommendations to the ALAC

Issue Presentation (Staff or CPWG Member)

ICANN Remit?

"Policy" Issue or Forward?

Unique Individual End User Perspective?

Develop Position/Action

CPWG Ingest Process

Individual End Users

- NOT a Distinct Group of People! (Grandma)
- End User is a ROLE
 - Defined by a category of individual "end user" activities (email, surfing, banking, reservations, social media, media streaming, etc.)
 - We are ALL "individual end users" MOST OF THE TIME

The At-Large Endeavors to

- Identify the implications of ICANN actions to the "Individual End User Experience"
- 2. Prevent the Degradation of and Continuously Improve that Experience, whenever possible, within ICANN's remit.

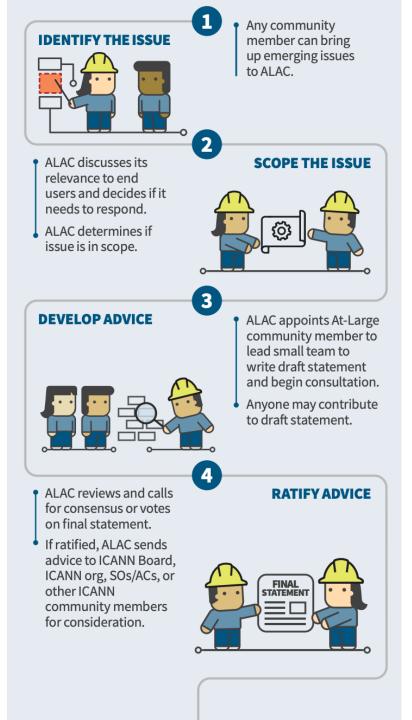

End User Experience Often "Caught in the Middle"

What is Policy?

- Where does policy come from?
 - Most Often Policy is Developed by the GNSO via Workgroups
 - Sometimes it is Developed by Cross Community Workgroups
 - Sometimes it is born out of the At-large community
 - Sometimes it is accidentally developed by the Board or Staff
- CPWG Develops Consensus Positions for use by...
 - WG Participants/Champions
 - Comment or Advice Drafters
 - ALAC
- CPWG Forwards Tasks if clearly not "Policy"

Our Process?
