Open TMCH Charter Questions Updated as of 18 September 2					
Proposal	WG Discussion/Decision	AGB Reference	TMCH Guidelines Reference		

Summary of Proposals relating to Open TMCH Charter Questions Draft prepared by ICANN staff (originally circulated on 17 May 2017; TMCH/AGB references added on 27 August 2019;

new/updated proposals submitted by WG members in September 2019)

As of 28 April 2017, the questions below are those that are currently open as part of the initial TMCH review. All other questions have either been deferred for further review following the Working Group's discussion of Sunrise and Claims Notifications, or agreed as not requiring further discussion at this time. For details on these other questions, please refer to the "<u>TMCH Next Steps Table – updated 30 March 2017</u>" on the following wiki page: <u>https://community.icann.org/x/Jb-RAw</u>.

Please note: To assist the WG's deliberations on the open questions, RPM WG Co-Chairs suggested adding relevant rules from the <u>Applicant Guidebook (AGB)</u> and the <u>TMCH Guidelines</u> in columns 3-4. Note that Q7 and Q8 reference the same rules in the AGB and TMCH Guidelines. Due to space limitations, only partial quotes have been included. Please click the page links for the complete text.

Updated as of 18 September 2019

Proposal	WG Discussion/Decision	AGB Reference	TMCH Guidelines Reference
The Trademark Clearinghouse should <u>not</u> accept for inclusion marks where all textual elements are disclaimed and as such are only protectable as part of the entire composite mark including its non-textual elements. 3. The Working Group recommends that a new grounds to the challenge procedure be added to assess whether the underlying trademark registration was obtained in bad faith as a pretext solely to obtain a Sunrise registration. In preparing the grounds for such challenges, guidance may be drawn from the pre-delegation Legal Rights Objection consideration factors: <u>http://www.wipo.int/amc/en/domains/Iro/faq/#3</u> a and the judgement of the European Court of Justice in Case C-569/08 Internetportal und Marketing GmbH v. Richard Schlicht <u>http://eur-lex.europa.eu/legal- content/EN/TXT/HTML/?isOldUri=true&uri=CELEX:62008CJ</u> 0569.			2.4. Marks protected by statute of treaty For marks protected by statute or treaty, the relevant statute or treaty must be in effect at the time the mark is submitted to the Clearinghouse for inclusion. These marks may include but are not limited to: geographical indications and designations of origin.

(1) Proposal submitted by Michael Graham:	WG notes that this proposal is limited	AGB (page 296)	TMCH Guidelines
 We (the RPM Working Group) have identified a minor change in current TMCH Trademark Claims Service practices that could benefit both Domain Name Applicants and Trademark Owners: 1. We have become aware that Domain Name Applicants (Applicants) and Trademark Owners who have registered their trademarks in the TMCH (TMCH Trademarks) have both sustained unnecessary expense in time, effort, and planning when Domain Names that have proceeded to registration contain strings that are confusingly similar to TMCH Trademarks are challenged after their registration. 2. Current Trademark Claims Notice rules limit the issuance of Notifications to applications that consist solely of the exact TMCH Trademark. 3. As a result, Applicants are unaware of potential conflicts and may proceed with expending time, money and planning on the use of Domain Names that may be challenged. 4. Applicants should have the ability to consider whether to proceed with their planning and use of Domain 	to: • TM Claims • Plurals and "marks containing the TM"	6.1.5 The Trademark Clearinghouse Database will be structured to report to registries when registrants are attempting to register a domain name that is considered an "Identical Match" with the mark in the Clearinghouse. 	RATIONALE AND ADDITIONAL CONTEXT FOR THE PROPOSALS
Q7. H	low are design marks currently handled by the TMCH provider?
<u>Ratio</u>	nale for the proposal submitted by Kathy Kleiman and Zak Muscovitch:
	ationale submitted in this document here: <u>https://mm.icann.org/pipermail/gnso-rpm-</u> ttachments/20190918/e9fbcd9d/KleimanMuscovitchProposal09042019-0001.pdf
<u>Ratio</u>	nale for the proposal submitted by Greg Shatan:
А.	Introduction.
1. Trade	The GNSO Council recommendations (based on the STI Final Report) stating that the types of marks to be accepted by the emark Clearinghouse are as follows:
	"4.1 National or Multinational Registered Marks The TC Database should be required to include nationally or multinationally registered "text mark" trademarks, from all jurisdictions, (including countries where there is no substantive review). (The trademarks to be included in the TC are text marks because "design marks" provide protection for letters and words only within the context of their design or logo and the STI was under a mandate not to expand existing trademark rights.)" <u>https://gnso.icann.org/en/issues/sti/sti-wt-recommendations-11dec09-en.pdf</u>
2. publi	The ICANN Board "supported the substantive content" of the STI recommendations and tasked ICANN staff with analyzing c comments and developing a final version of the Clearinghouse proposal for the Applicant Guidebook:

Updated as of 18 September 2019

Discussion/Decision	Proposal	WG Discussion/Decision	AGB Reference	TMCH Guidelines Reference
---------------------	----------	---------------------------	---------------	------------------------------

2. For a Marks that does not exclusively consist of letters, words, numerals, special characters.

The recorded name of the Trademark is an identical match to the reported name as long as the name of the Trademark includes letters, words, numerals, keyboard signs, and punctuation marks ("Characters") that are: • predominant; and

• clearly separable or distinguishable from the device element; and

• all predominant characters are included in the Trademark Record submitted to the Clearinghouse in the same order they appear in the mark.

In the event that there is any doubt about the order in which the characters appear, the description provided by the Trademark office will prevail. In the event no description is provided, such Trademarks will be allocated to a Deloitte internal team of specialists with thorough knowledge of both national and regional trademark law who will conduct independent research on how the Trademark is used, e.g. check website, or they may request that the Trademark Holder or Trademark Agent provide additional documentary evidence on how the Trademark is used."

5. Following 4.2.1(1) ("a Trademark exclusively consisting of letters, words, numerals and/or special characters") Deloitte provided an example with two registrations of the mark DEALSAFE (see Guidelines, p. 19), with the legend "Based on the above trademark, the recorded name of the mark is DealSafe. In no event would the Clearinghouse accept "DEAL", "SAFE" or "SafeDeal" based on the reported name of the trademark." Notably, the EU registration identifies the "Type of Mark" as "Figurative," while the U.S. registration identifies the "Mark Drawing Code" as "(6) Words, Letters, and/or Numbers in Stylized Form." In other words, the example of "a Trademark exclusively consisting of letters, words, numerals and/or special characters" is a figurative or stylized mark, not a "text" or "standard form" mark.

6. There are a variety of different types of marks, but as Deloitte notes "there is no unilateral international definition of different types of trademarks." (Follow Up Questions For Deloitte From The GNSO's Review Of All Rights Protection Mechanisms (RPM) Review Policy Development Process Working Group, Updated 5 March 2017, Para. 6 (responding to the question "How many such "device" or "image" marks have been submitted and validated?")) Nonetheless, one can consider the types of marks along a spectrum, with the following non-exhaustive examples:

Proposal	WG Discussion/Decision	AGB Reference	TMCH Guidelines Reference
1. exclusively consisting of letters, words, nur	merals and/or special characters,	, with no claim as to fo	nt or color
2. exclusively consisting of letters, words, nur			
3. exclusively consisting of letters, words, nur using a stock font)	merals and/or special characters	but stylized in some m	anner beyond simply
4. exclusively consisting of letters, words, nur	merals and/or special characters	and claiming color(s) a	nd a font or stylizatio
 exclusively consisting of letters, words, nur use of a trefoil to dot the "i") 	merals and/or special characters	but with non-textual d	etails (e.g., adidas's
6. text with a design element, and the text is element	predominant and clearly separal	ble or distinguishable f	rom the device
text with a design element, and the text is element	predominant but is not clearly se	eparable or distinguish	able from the device
8. text with a design element, and the text is device element	not predominant although it is c	learly separable or dist	inguishable from the
9. text with a design element, and the text is element	neither predominant nor clearly	separable or distinguis	hable from the device
10. a design that does not contain any text el	ement		
11. three-dimensional marks			
12. sound marks			
13. color marks			
14. other non-traditional marks			

Example 1 may be referred to under U.S. law and practice as "standard form" marks, while 2-5 may be referred to as "stylized" marks, while examples 6-10 may be referred to as "design marks." Under E.U. law and practice, example 1 may be referred to as a "text" mark, while examples 2-9 may be referred to as "figurative + text" and example 10 as "figurative." However, as may be

Open TMCH Charter Questions Updated as of 18 September 2019

Discussion/Decision Reference	Proposal	WG	AGB Reference	TMCH Guidelines
		Discussion/Decision		Reference

seen from the example on page 19 of the Guidelines, the E.U. does not appear to consistent – the word DEALSAFE in a stock font is referred to as a "figurative" mark.

7. Certain national trademark laws (e.g., the United States, see 15 U.S.C. Section 1056 ("The Director may require the applicant to disclaim an unregistrable component of a mark otherwise registrable. An applicant may voluntarily disclaim a component of a mark sought to be registered.") and multinational treaties (e.g., the Madrid Protocol, Rule (9)(4)(b)(v)) include or recognize the use of disclaimer requirements, Disclaimers may be used to disclaim certain words in any mark containing text, whether it is a "standard character" text-only mark (example 1), a stylized mark, or a mark with words and a design element. The significance of disclaimers under U.S. law is explained as follows in the Trademark Manual of Examining Procedure 1213:

The significance of a disclaimer is conveyed in the following statement:

As used in trade mark registrations, a disclaimer of a component of a composite mark amounts merely to a statement that, in so far as that particular registration is concerned, no rights are being asserted in the disclaimed component standing alone, but rights are asserted in the composite; and the particular registration represents only such rights as flow from the use of the composite mark.

Sprague Electric Co. v. Erie Resistor Corp., 101 USPQ 486, 486-87 (Comm'r Pats. 1954).

A disclaimer may be limited to pertain to only certain classes, or to only certain goods or services. <u>https://tmep.uspto.gov/RDMS/TMEP/current#/current/TMEP-1200d1e11717.html</u> (emphasis added). The essence is that the disclaimer indicates that the registrant is not claiming any rights in the disclaimed component "only within the context of" the composite mark.

8. The situation that the RPM Working Group seeks to address is the inclusion of certain "design marks" in the Trademark Clearinghouse where the underlying trademark registration provides "protection for letters and words only within the context of their design or logo" (i.e., where the registrant would otherwise not be permitted to own trademark rights in that term, but for the inclusion in the mark of non-text elements.) As can be seen above, this is consistent with the description of a disclaimed term. However, it is not consistent with the extent of protection under most (if not all) trademark legal regimes for the letters or words in a mark where the words are not disclaimed, including a stylized or design mark. Stylized marks do not include a "design or

	WG Discussion/Decision	AGB Reference	TMCH Guidelines Reference
logo" so are clearly protected beyond the context of a "	a design or logo, while even mar	rks that consist of text a	are protected beyond
As such, the TMCH is currently both under- ar TMCH. On the other hand, marks consisting of words clearly separable or distinguishable are not registrabl thus protected beyond the context of a design or logo	s and designs where the words c le in the TMCH even though the	lo not predominate and	d/or the words are not
10. The TMCH should not expand existing tradem	ark rights, but neither should it	fail to recognize existin	g trademark rights.
11. The Trademark Clearinghouse has a Dispute R decision of the Verification Provider that a Trademarl incorrectly verified (more specifically: (i) The Tradem in the Trademark Record is not the holder of the under equirements for inclusion in the Clearinghouse).
