

Expression of Interest (EOI) Form

By submitting my personal data, I agree that my personal data will be processed in accordance with the ICANN [Privacy Policy](#), and agree to abide by the website [Terms of Service](#).

1) Name:	Pooya Teimoory
2) Country of primary residence:	Iran
3) Current employer (s):	Pars Online Telecommunications
4) Current position (s)	Senior Network Engineer
5) Have you been and/or are you involved in any ICANN related working groups? If yes, which stakeholder group do you represent? Are you part of any ICANN constituency?	Unfortunately, no; but I am very interested to have the chance of being involved in a working group.
6) Please explain your interest in participating in the Strategy Working Group. What will you bring to the Strategy Working Group, if selected?	<p>Due to my 4 years of background in the communication service provider industry and also being a researcher at the university; I think that I can be an effective representative from technical community and academia in the Strategy Working Group. I have good experiences in planning, policy making and process design and management so I think that I can actively participate in making strategic plans.</p> <p>I know many people in the Internet industry of Iran as country in the middle-east and so I can convince them for cooperation to realize the strategies made by the Working Group.</p>
7) Additional Information (Optional)	<p>I am working as a senior network engineer at Pars Online group of companies, one of the largest Communication Service Providers in Iran, and also a researcher at Islamic Azad University South Tehran Branch. My main activities, experiences and responsibilities include but not limited to IP/MPLS Network Design, Enterprise Network Solution Architecture, Network Automation and Software Defined Networking. Now days we are working on automation of Pars Online network as a leading Service Provider in Iran, also individually I am doing my research studies on 5G and its emerging technologies with focus of using SDN and NFV.</p>

After attending MENO 18, it became more tangible for me that we can accelerate network development by using the valuable experiences of other community members. Attending RIPE78 meeting as a fellow was a valuable experience for me from social and technical aspects. I had no idea before about how members of a great community with such diversity can communicate so openly and friendly. Being a RIPE fellow gave me the chance to have a more comprehensive understanding about how Internet community works and meeting key players and policy makers of the RIPE region.

I should mention that I have good knowledge about ICANN and its multi-stakeholder approach as I have passed following courses through ICANN learn platform:

102.1 Introduction to ICANN

500.1 Internet Diplomacy
