Reviews are an important element of ICANN’s multistakeholder model and continuous improvement. Improvements resulting from these reviews speak to ICANN’s accountability and transparency, and its ability to evolve as an institution that continuously improves, promoting the global public interest, with sensitivity to the changing environment as it relates to ICANN’s mission. Developing recommendations that propose improvements and implementing such recommendations effectively is required for the reviews to serve their intended purpose. With the wide range and scope of community-related review recommendations, there have been discussions within ICANN (community, Board and the ICANN organization) that have opened up the possibility for collaboratively engaging to make these recommendations more effective.
