Identifying Stakeholder Communities (SC)

Potential Candidates for "Stakeholder Communities" as defined
- ccTLD registries
- gTLD registries
- Registrars
- IANA/(RZM?)
- DNS Resolver Operators*
- Internet Service Providers (ISPs)
- Sovereign states
- Others?

Potential Candidates for Liaison
Important to maintain relationship, but not "Stakeholder Communities" as defined
(Principle 1.224)
- IETF
- SSAC
- (RZM?)
- Internet Service Providers (ISPs)
- Sovereign states
- Others?

*DNS Resolver Operators which are not represented in the ISP and Connectivity Providers Constituency of the GNSO. The DNS resolvers community would need to organize in some fashion to then engage with the RSS GS as an SC.

Proposed discussion methodology
1. Discuss one candidate Stakeholder Community at a time
2. Analyze/assess each candidate Stakeholder Community using our Stakeholder Community Principles and ask, "How closely does this candidate match the requirements set out in those principles?"
