4. AOB

5. Next meeting & Closure
   Wed. 29 Jan 2020 | 13 UTC

Action items 4 Dec (1/2)

- *Action item #1:* Secretariat to prepare a benchmark overview of the past satisfaction survey results.
[ONGOING]

- *Action item #2:* MPC group members are invited to send final comments by the end of the week on the proposed draft feedback-on-feedback. Following closure of the comment round, the ccNSO Secretariat will publish the document and will share it with the community.
[COMPLETED]

- *Action item #3:* MPC members and observers to review draft members meeting agenda and suggest improvements or corrections – if any, including suggestions for presenters and session chairs from the LAC region . Secretariat to come up with a next iteration of the draft members meeting agenda by the next MPC meeting on 18 December at 13 UTC. [FOR DISCUSSION 18 DEC.]

Action items 4 Dec (2/2)

- ***Action item #4:*** Secretariat to send out call for volunteers for new members to the MPC, after approval by the ccNSO Council during its next meeting on 19 December
[ONGOING]

- ***Action item #5:*** The ccNSO Secretariat will send out a call for presenters for the ccTLD News Session, during the week starting on 9 December. Kindly provide joke.braeken@icann.org with your input by the end of Friday, 6 December 2019, 23:59 UTC, in case you do not agree with the proposed call for presenters.
[COMPLETED]

- ***Action item #6:*** The ccNSO Secretariat to adjust the MPC membership records, based on the input received.
[COMPLETED]

ccTLD News | proposals (1/3)

1)   .uk | Eleanor Bradley – proposal will be updated/refined

The conclusion of the .uk second level release process

In 2014 registration was permitted for the first time at the second level under .uk – for over 30 years registrations had been allowed only at the third level e.g. example.co.uk. As part of the release process the second level equivalents for c. 10 million existing registrations were reserved for a five year period. The five year reservation period ended in June 2019 and some 3 million outstanding rights lapsed. This presentation explains the challenges and approach in releasing this volume of domains in a technically secure and fair manner, and presents the outcomes of that release process. Includes national advertising, participation of over 400 registrars, resourcing up for disputes, coordination with our communities and govt, separate EPP connections so as not to impact daily 'business as usual' registrations. Significant coverage in the press, additional registration volumes and revenues for the registry.

ccTLD News | proposals (2/3)

2) .tr | Abdullah Cemil Akçam

Transfer ccTLD Management to BTK

3) LACTLD | Nacho Estrada

Anycast Cloud
The LACTLD Anycast Cloud is a collaborative network that seeks to strengthen the DNS infrastructure and stability in Latin America and the Caribbean. Since its formalization at IGF 2016 in Guadalajara, the Cloud has been growing with the incorporation of new clients and nodes. Thus, it has contributed to the Internet strengthening and development in the region. We would like to present the project as an example of regional collaboration.

4) .cl | Patricio Poblete

Running a ccTLD in crisis mode
presentation about how we have handled the operations of NIC Chile during the current crisis. We have been able to provide basically uninterrupted service even if at times is was physically impossible for most of our staff to come to the office

ccTLD | proposals (3/3)

5)   .rs and .срб | Dejan Djukic

Right protection mechanisms within .rs and .срб domains
Presentation will focus on right protection mechanisms under our two domains. It will include our local ADR (UDRP) rules, compliance policies and policies for registration data disclosure adopted after GDPR came into force.

6)   .ke | Joel Karubiu

The importance of domain names in the growth of a digital economy - Case study of Kenya
We are involved in the development of a digital economy in Kenya, and as CCTLD , we are involved as part of critical infrastructure. in this way .KE domains are key for identification of anyone on e-commerce platforms. We also are registering small and medium enterprises that want to trade with government and other related bodies. The importance of the CCTLD cant be understated in the success of this and we continue to see this as the economy grows. The Challenge we face is now on taxation of the digital economy.
