

ATRT3 PLENARY MEETING

01 APR 2020

ATRT3 Report V1.8

Issue 9: Accountability Indicators

Discussion

DISCUSSION TOPICS

- ⊙ Purpose:
 - Reporting of org's progression towards achieving the FY16-20 Strategic Plan

- ⊙ Journey
 - Several mechanisms used since 2015
 - Key Challenges
 - Continuous Improvement

- ⊙ Plan for FY21-25 Strategic Plan Progress Reporting

- ⊙ Questions from ATRT3

- ⊙ For ATRT3 Team Consideration

Questions from ATRT3 Team

1. ATRT3 is seeking insights into any plans or is in progress that we are unaware of that may already be working on that will be going to recognition or remediation of the concerns the ATRT3 RT has raised. (Board notes in its public comment that ICANN org plans to undertake improvements to the accountability indicators.)
2. If there are any items in the concerns that they have raised that from your point of view may benefit from clarification.
3. Is there anything that you consider in the Open Data Program that may be useful for the ATRT3 to consider as recommending to include in the Accountability Indicators?
4. Is the list of data collected by ICANN with ODI is closed or open?
5. Where can we find the list of data currently collected within or for ODI?
6. In addition to ODI, is there any other data collected by ICANN and if yes where can we find the list?
7. Regarding CCT and the request for data: Do ICANN has a plan to collect the data needed? Within or outside ODI?

For ATRT3 Team Consideration

Accountability Indicators is one of the mechanisms to report ICANN org's progress towards the strategic plan.

Therefore, we suggest that ATRT3 Team would consider:

The focus on the purpose instead of the tool

With the focus on the purpose, the identified short comings of this tool and other aspects →

we can together derive improved sets of mechanics to achieve the goal of advancing the reporting of ICANN org's progress towards the new FY21-25 strategic plan.
