# Main Discussions

- DNS Abuse
- PIR
- Subsequent Procedures
- PICs
- EPDP
- Reviews

# DNS Abuse

- Number one issue for Individual End Users
- Any new round must wait for substantial reform
- We recommend
  - Abuse Thresholds for Domains
  - Wholistic Tools for Contract Compliance
  - Research into Machine Learning (ie .EU work)
  - Increase friction for Bulk Registrations
  - Decrease friction for access to registrant data

# PIR

- Support PIR Move to Open Contract for PICs
- Need to go further
  - Board Membership by Non-Profits Essential
  - Reserved seats on Stewardship Council for NPOC and ALAC
  - Further DNS Abuse Commitments
  - Enshrine Focus on Non-profits and individual Registrants

# Subsequent Procedures

- No Rush for a New Round
  - Must Wait on DNS Abuse Reform
  - Completion of SSAC Studies
- Focus on Communities
  - Priority Evaluation
  - Geo Name Priority
- Focus on Underserved Regions
  - Applicant Support
  - Further Geo Name Discussions

# Public Interest Commitments

- Support both Mandatory and Voluntary PICs
- ICANN has made some improvements, but we need more
- Enforcement has been Insufficient because of “scope.”
  - Compliance must perform an enforcement assessment for each voluntary PIC
  - Must be special dispensation for PICs used to address GAC objections
- PICDRP has been challenging because of “standing.”
  - ALAC must be pre-authorized to bring a PICDRP on behalf of “end users.”
  - ALAC must have budget to bring X PICDRP proceedings
  - ICANN must NOT limit scope of PICDRP instructions to ICANN remit

# EPDP

- DNS Abuse Prevention Challenged Now
- Data Access by Researchers and Law Enforcement a Priority
- Support Automation Where Possible

# Reviews

- Both ATRT3 and SSRT2 Highlight Implementation Disconnect
- Broadly Support Recommendations of both as well as CCTRT
- High Importance for SSRT and CCTRT Recs NOW
- Need to Get Prioritization Framework in Place
