

I gratefully accept this nomination and would look forward to serve APRALO as their ALAC member.

My primary area of interest is policy and I have been deeply involved in the development of ALAC policy for some time. I have given presentations to several ICANN meetings on issues surrounding privacy and WHOIS, developed and presented a five part workshop on policy development at another ICANN meeting, presented the ALAC perspective on WHOIS at a joint NCUC/ALAC meeting, and was the initial chair of the most recent Review of ALAC, developed. I presented a five session workshop on policy development, focussing on Competition, Consumer Trust, Consumer Choice at an ICANN meeting, organised a round table on Policy at another ICANN meeting and, most recently, developed and presented a policy panel discussion on DoH/DoT at the most recent (virtual) ICANN meeting.

I have 'held the pen' developing ALAC policy positions on a number of issues, and been a member of GNSO working groups of issues including ITRP, privacy/proxy services and WHOIS.

I have developed and delivered presentations on policy issues in several APAC meetings, and report to the monthly APRALO meetings on policy issues being considered by ALAC.

I also attended and presented at two regional IGF meetings, at the Cook Islands and Armenia.

I regularly attend and contribute to discussions in the weekly ALAC Consolidated Policy Working Group and would deeply appreciate the opportunity to continue to bring the APAC perspectives to policy discussions in ICANN.
