

I am humbled and honoured.

Having been part of ICANN, I was part of the 2016 NextGen programme and mentored new participants through the NextGen Ambassadors' programme, as well as part of the selection committee. Also, I was an ICANN fellow under the AtLarge mentorship.

Additionally, I have participated in several working groups including but not limited to the Rules of Procedure WG, Right Protection Mechanism WG and the AFRALO Newsletter WG. I have also been a pen holder for different policy comments on IANA transition and ICANN organizational reviews.

Currently, I play an active role at the Africa IGF; I am part of the steering teams of the East Africa and Kenya IGFs. I also serve at the Secretariat and leadership roles of different membership and volunteering organizations such as KICTANet.

I am equally involved in policy and stakeholder engagements in Kenya on a wide array of ICT subjects such as data protection, internet access, cybersecurity and digital inclusion.

I hope to bring these experiences to serve you in this community.

Once again, I count on your kind support to serve at AFRALO Secretariat.

Kind regards,
