

I thankfully accept this nomination for Vice-Chair, and I hope my dedication and commitment to supporting the region are an indication of my credibility and ability in helping APRALO going forward.

In the past years, we have been very much focused on engagement and outreach, as well as policy awareness and contributions. A number of great achievements I have been involved in include the special mentorship student program in Kobe, ATLAS III coaching, and At-Large Ambassador in Montreal. Being a Co-chair on the Outreach and Engagement Sub-committee involves working alongside my leadership colleagues to prepare strategic planning and activities as my responsibility for across the APRALO region. I have given regular reports on the work of the O&E committee at our monthly APRALO meetings. Virtual activities have become very important, especially at this time when my participation in other activities, like APRICOT and Middle East DNS forum had to be cancelled due to COVID-19. During the year I was able to participate in the SmartSec conference and exhibition.

Looking forward to fruitful contributions to serve the end-user community together with APRALO / ALS members.
