Basic Analysis

- Our members are interested in everything. So no lack of potential topics for presentations.

- A few subjects are of special interest.

- The *same* high interest subjects were the ones with the most people willing to work on them.

- Need specific topics within subjects for projects

Analysis
Other additional comments for topics

- **Outreach and Engagement**:
  - What brought people into ICANN?
  - How we can bring more people in? Especially from underserved communities.

- **Documentation - how things work**:
  - What is the consensus process,
  - How to submit individual comments to ICANN,

NEXT STEPS

Recommendations

- Include brief background presentations on subjects of interest in every monthly meeting.

- Select specific topics and schedule them for monthly calls
  - Include project on how things work, and making that information more understandable and accessible

- Research how we can effectively reach out to new members

- Work on getting existing and new members involved in projects. All volunteers should be embraced.
