09:27:59   From kc : To the extent ICANN would consider UDRP cases as part of any DAAR or Domain Name Marketplace Indicators, it should be noted that while the UDRP supports consumer trust, this is trust earned only after significant time and expense is invested by brand owners (and in some cases only after a fraud has been perpetrated on end users). The continued availability of the UDRP, as operated by WIPO on a not-for-profit basis, moreover benefits Contracted Parties and ICANN by keeping them out of disputes. The fact that WIPO has seen record-breaking numbers of UDRP cases over the years illustrates that the root issue of cybersquatting is not itself being addressed.

To this end ICANN may wish to look at programs instituted in the .EU and .DK domain spaces.

09:28:08   From kc : Work is already underway by ICANN org towards implementation of this recommendation. If the SSR2 RT's intent is to recommend implementation of something beyond what is in progress with ongoing work, ICANN org encourages the SSR2 RT to provide specific details.
