

Issue Brief: MSM model request for
comments due Aug. 5

Issue Presenter: Marita Moll

Request for comments on priority work areas

The Work Plan: input on the **priority work areas** and whether the mechanisms or actions outlined sufficiently address the identified gaps in work already underway; feedback on the gaps identified in the Work Plan, and additional gaps that should be considered.

- *prioritization of work and efficient use of resources

- *precision in scoping the work

- *consensus, representation and inclusivity

(previously known as “low hanging fruit”)

Request for comments on “remaining work areas”

Remaining Work Areas: We also welcome any community-driven actions to help address the remaining work areas. We would like to know if your community group would like to initiate or coordinate any other actions.

- *complexity of (a) tools to access information and data and (b)content

- *culture, trust and silos

- *roles and responsibilities of ICANN org, board and community

(more overarching issues which will take longer to resolve)

Request for comments on proposed evaluation mechanism

Evaluation Mechanism: The Work Plan includes a proposed evaluation mechanism to gauge whether the project is achieving its goals. We would like to hear your thoughts as to whether periodic evaluation should be conducted and if so, whether it should be done by using existing structures such as the strategic plan review process, or if you believe other more suitable means should be considered.

Proposed At-large Positioning

- .On work plan
- .On sidelining the last three issues
- .On evaluation
