

Issue Brief – MSM model presentation July 2020

Evolving MSM model
request for comments due Aug 2rd

Presenter Marita Moll
Presentation #2

Addressing the gaps on Priority Work Areas

6 issues were identified as priority out of the original 21. The following 3 are to be addressed first:

- .Prioritization of work and efficient use of resources
- .Precision in scoping the work
- .Consensus, representation and inclusivity

Prioritization of work and efficient use of resources

This means: Try NOT to do everything at once; create tools to prioritize and make trade-offs..

Work currently underway that enable focus on prioritization/resources:

- › Streamlining reviews – (org, Board, community)
- › ATRT3 (community)
- › Operational planning process (.org)
- › SO/AC leadership engagement (community)

cont'd next slide

Prioritization of work/efficient use of resources (work underway cont'd)

- .Board prioritization work (Board)
- .CEO goals and cascading goals (org.)
- .Project costs support team (org.)
- .Fact sheets (focussed on Review Team fact sheets) (org.)
- .Improving communications between ICANN.org and community (org.)
- .Improving ICANN.org public meeting planning to enhance community work (org.,community)

Addressing gaps in prioritization of work/use of resources work plan

Added activities (over & above prev. list) focussed on cross community agreement and sharing ideas (mostly underway and could be enhanced)

- Each community should create a yearly priority list/work plan and share it at SO/AC chair's meetings
- Develop a community agreed upon engagement mechanism to facilitate early involvement of chairs to collaboratively prioritize communities' work within the constraints of available budget
- Start budget discussions among chairs and .org earlier to allow for more time for collaboration and agreement

Bottom line for all 3 issues

The goal is to address the issue without adding a burden to community work. Do these suggestions (ongoing work and additional actions) do the job?

- .What other gaps do we, as a community of endusers wish to see addressed?
- .What comments do we want to make regarding the “work underway” and how these can address our issues?
- .How can progress be evaluated?

Further work

The other 2 priority issues are outlined and addressed in exactly the same way with differing details.

.Precision in scoping the work

.refer to report for details

.Consensus, representation and inclusivity

.see next slide.....

Issue 3: Consensus, representation and inclusivity

*An opportunity for creative input --
additional actions offered are webinars
on consensus and pdp3.0 and ICANN
Learn.*

For example we could add:

.Supporting community led initiatives like various
forms of Schools of Internet Governance

.Other?
