## <WHAT TO EXPECT>

DNS Abuse Framework at 3.

### DNS Abuse Framework

When should a registrar or registry act on website content abuse?

Specifically, **even without a court order**, we believe a registry or registrar should act to disrupt the following forms of website content abuse:

- (1) child sexual abuse materials (“CSAM”);
- (2) illegal distribution of opioids online;
- (3) human trafficking; and
- (4) specific and credible incitements to violence.

I&J Operational Approaches at 25.

# Current legislative processes and their impact onto ICANN's #DNSAbuse policies

## <WHAT TO EXPECT>

- How can we still **guarantee fundamental rights** e. g. freedom of speech, if we agree on such **DNS remedies**?
- How can we tackle the **problem of end-user DNS abuse** realistically but still having **safeguards** implemented that **prevent potential misuse** and **ensorship** by **decision-makers**?
- Should there be a **supervisory board /body**?
- What should the **supervisory board /body** look like that **reviews an initial decision**?
- Who will concretely **decide** at a **registry or registrar level**, and on what capacity?
- How will the **decision-makers gain** the **respective skillset** if we agree on such **DNS remedies**?
