Zoom Chat Transcript
SSR2 Plenary #124 – 8 October 2020

09:04:25   From Brenda Brewer : Good day! Welcome to SSR2 Plenary #124 8 October 2020 @ 14:00 UTC. This meeting is recorded. Kindly mute your audio when not speaking. Please state your name for the record before speaking. Thank you.

Please observe the ICANN EXPECTED STANDARDS OF BEHAVIOR found here: https://www.icann.org/resources/pages/expected-standards-2016-06-28-en and the ICANN COMMUNITY ANTI-HARASSMENT POLICY found here: https://www.icann.org/news/blog/community-anti-harassment-policy.

09:04:38   From Laurin Benedikt Weissinger : https://docs.google.com/document/d/1q61FjWnQutd1F9IxlzQXVF5DWluKojaoYuDXRny5CVA/edit

09:15:54   From Heather Flanagan : I've added a Table of Contents to make the new structure more obvious for the people on this call.

09:17:53   From Laurin Benedikt Weissinger : Thanks Heather!

09:18:26   From Zarko Kecic : sorry I'm late

09:18:55   From Laurin Benedikt Weissinger : Hi Zarko!

09:27:02   From Jennifer Bryce : Here is the public comment response spreadsheet: https://docs.google.com/spreadsheets/d/1DQpPA0aLDsW5IHLKgQqHtW-5860CKGCuTYIOeMPEaaw/edit?usp=sharing

09:28:08   From Dennis Tan (observer) : Thanks to the abuse sub-team for the effort put on this section rewrite. This is the first time I see this new text so I can't comment on the more substantive issues. That said, I find some pieces of information a bit unclear. For example: the concept of TLD-chaining and the example using a ccTLD. It is common practice for ccTLDs to offer third-level registrations e.g. google.com.to (see https://publicsuffix.org/list/public_suffix_list.dat). I don't think the sub-team is suggesting ccTLD practices lead to abuse? Perhaps a better example is needed here.

09:28:59   From Laurin Benedikt Weissinger : That is correct, Dennis. Good point!

09:29:19   From Laurin Benedikt Weissinger : We should have picked up on that one…

09:45:22   From Dennis Tan (observer) : The IDN implementation guidelines is meant to be a light weight set of guidelines or policies specific to IDNs. What is suggested here re: trademark, etc. seems to be a overarching issue for all types of domain names

09:47:27   From Laurin Benedikt Weissinger : Dennis, again you are raising a good point here. There is more on this below (might need moving)

09:59:48   From eoster@gmu.edu : I have a hard stop and have to drop.

10:00:12   From Laurin Benedikt Weissinger : Very much agree with Kerry-Ann! This is a team effort!

10:01:36   From Laurin Benedikt Weissinger : Not only kc mentioned this, I did as well — and I still see the need to create a well-defensible, empirically grounded, justified report.

10:02:09   From Laurin Benedikt Weissinger : Completely agree Kerry-Ann, we need to work together on this!

10:05:23   From Laurin Benedikt Weissinger : Just a note to everyone: we are five minutes over. Zarko has been patiently waiting.

10:07:26   From Laurin Benedikt Weissinger : Zarko, take this document and the risk document and "rip it apart". We need to get this internal critique to finalize this report.

10:07:34   From Kerry-Ann Barrett : maybe the DAAR recommendation rewrite would be a good example

10:09:41   From Laurin Benedikt Weissinger : Thanks all for staying late, particularly staff!

10:09:53   From Kerry-Ann Barrett : bye

10:10:01   From Zarko Kecic : bye
