2 - Issue Scoping

Title:	Registration Data Accuracy Scoping Team (RDA_ST)

Description & Scope:	The GNSO Council adopted a proposal on 21 October 2020 which recommended that a Scoping Team address the effects of GDPR on Registration Data accuracy requirements and the Whois Accuracy Reporting System (ARS), stating, "a scoping team would be tasked to, 'facilitate community understanding of the issue; assist in scoping and defining the issue; gather support for the request of an Issue Report, and/or; serve as a means to gather additional data and/or information before a request [for an Issue Report] is submitted'. On 22 July 2021, the GNSO Council confirmed the formation of and instructions to the Accuracy Scoping Team. The Scoping Team will be tasked to consider a number of accuracy-related factors such as the current enforcement, reporting, measurement, and overall effectiveness of accuracy-related efforts. These considerations are expected to help inform its deliberations and the development of recommendations to the GNSO Council on whether any changes are recommended to improve accuracy levels, and, if so, how and by whom these changes would need to be developed (for example, if changes to existing contractual requirements are recommended, a PDP or contractual negotiations may be necessary to effect a change).

Status/Health Rationale:

● This Status of this project was placed "On-hold" 31 Aug 2022 with the delivery of Assignments #1 & #2 awaiting further instructions from the GNSO Council. The Health remains as "In-Trouble" due to the yet to be delivered Final Report of all four assignments based on a variety of un-planned dependencies to complete its work.

Current Activities:

● During the Council's April 2023 meeting, ICANN org briefed the Council on the update it sent to the GNSO Council on the status of the Council's request.
● As 6 months have now passed from the Council's November resolution, the Council passed a new resolution during its July meeting, further deferring consideration of the recommendations #1 and #2 for an additional six months.
● Following the adoption of its resolution during the July Council meeting, the Council wrote to ICANN org and the chairs of the Registrar Stakeholder Group and Registries Stakeholder Group, to inform them of its decision to further defer work on this topic until such time the DPA negotiations between ICANN org and Contracted Parties have completed and there is feedback from ICANN org on if/how it anticipates the requesting and processing of registration data will be undertaken in the context of measuring accuracy, or for six months, whichever is the shorter. To that end, the Council requested an update from all parties, a timeline by which the DPA negotiations are expected to be completed, as well as any next steps that are anticipated.

Planned Activities:

● Once the DPA negotiations are completed and feedback is received from ICANN org, the GNSO Council will review the formation and instructions to the Scoping Team to ensure these are still fit for purpose, taking into account the summary results of the survey that was conducted amongst Scoping Team members to better understand the issues encountered.
● Council to determine timing and process for searching for a new Chair for the Scoping Team.

Open Issues & Risks:

● Work of the Scoping Team is paused while it awaits a response from ICANN org in relation to the EDPB outreach on whether registration data can be legitimately accessed to measure the state of accuracy as well as to gather data to help inform Assignments 3 & 4.
● Project Change Request and project schedule revision will be required prior to the Scoping Team restarting its work.

Completed in prior period(s):

● None for this period.

Status/Health Rationale:

● This effort has been placed "On-Hold" and yet to start as a formal project.

Current Activities:

● ICANN org is working with contracted parties on the data protection agreement from EPDP-P1 implementation prior to further work on the WHOIS Conflicts Procedure.

Planned Activities:

● GNSO Council to consider the proposal, if and when available, and determine next steps according to the go-forward plan.

Open Issues & Risks:

● This issue remains outstanding since the GNSO Council resolved to take step 1 of the go-forward plan in October of 2020.

Completed in prior period(s):

● The GNSO Council adopted the charter for the ICANN Procedure For Handling WHOIS Conflicts with Privacy Law Implementation Advisory Group (WHOIS Procedure IAG) during its meeting on 22 February 2018.
● Per the Council's past discussions, noting the current workload and activities that may impact the IAG's work, staff refrained from circulating the call for volunteers to the GNSO Stakeholder Groups until the EPDP Team completed certain milestones (e.g., delivery of its Final Report).
● During its extraordinary 23 July 2020, the GNSO Council agreed to send out a call for volunteers for a small group of GNSO Councilors, who were tasked with reviewing the Charter and providing the Council with a recommendation for next steps.
● The small team met on 26 August 2020 and agreed on a set of next steps, which were communicated in writing to the Council for its feedback.
● The Council passed a consent agenda resolution to begin with the first step of the go-forward plan for "ICANN org, in consultation with contracted parties, to draft a proposal for a modification to the existing Procedure based on its past experience with both the WHOIS Conflicts Procedure and the registrar data retention waiver process."
● Council letter to GDS Staff, informing GDS of ICANN org's action item based on the Council's consent agenda resolution, requesting ICANN org, in consultation with contracted parties, work to consider possible amendments to the procedure in light of privacy regulations.
● ICANN org provided an update to the Council that it has been working with Contracted Parties to prepare a proposal for a modification to the existing ICANN Procedure for Handling WHOIS Conflicts with Privacy Law. ICANN org plans to provide a status update in June 2021.
● ICANN org provided a secondary update to the Council that it has been working with Contracted Parties to prepare a proposal for a modification to the existing ICANN Procedure for Handling WHOIS Conflicts with Privacy Law. ICANN org plans to provide another status update in November 2021.
● ICANN org provided a follow-on update to the Council that it will await the conclusion of data protection agreement work related to the EPDP-P1 implementation prior to further work on the WHOIS Conflicts Procedure.

Title:	PDP: New gTLD Subsequent Procedures (SubPro)
Description & Scope:	This WG was tasked with calling upon the community's collective experiences from the 2012 New gTLD Program round to determine what, if any changes may need to be made to the existing 2007 Introduction of New Generic Top-Level Domains policy recommendations. Title:	**EPDP: Standardized System for Access & Disclosure – Phase 2 (EPDP_P2)**
Description & Scope:	Following the adoption by the ICANN Board of a temporary specification on gTLD Registration Data to enable contracted parties to continue to comply with existing ICANN contractual requirements and with community-developed policies as they relate to WHOIS, while also complying with the European Union's General Data Protection Regulation (GDPR), a one-year policy development process was initiated to confirm whether or not the temporary specification should become a consensus policy. The GNSO Council adopted the Final Report during its Special Council meeting on 4 March 2019 and provided its non-objection to the commencement of Phase 2. The scope for EPDP Phase 2 includes (i) discussion of a system for standardized access/disclosure to nonpublic registration data (SSAD), (ii) issues noted in the Annex to the Temporary Specification for gTLD Registration Data ("Important Issues for Further Community Action"), and (iii) issues deferred from Phase 1, e.g., legal vs natural persons, redaction of city field, et. al. Following the review of the SSAD Operational Design Assessment (ODA) and subsequent conversations between the ICANN Board and the GNSO Council, it was decided to proceed with a "proof of concept" approach to help inform a decision on how to proceed with the EPDP Phase 2 Final Report recommendations for an SSAD. During its meeting on 27 February 2023, the ICANN Board directed ICANN org to proceed with the implementation of the Registration Data Disclosure Service (RDRS).

Completed in prior period(s):

- In April 2014 the Board voted to adopt those of the GNSO's recommendations, approved unanimously by the GNSO Council in November 2013, that are not inconsistent with GAC advice received on the topic. Following work by an Implementation Review Team (IRT), the finalized Consensus Policy on IGO and Red Cross, International Olympic Committee and INGO names was announced in January 2018, with an effective date of August 2018 for most aspects of the Policy.
- For those policy recommendations that are inconsistent with GAC advice (i.e. protection of IGO acronyms and certain specific Red Cross identifiers), the Board passed a number of resolutions in 2013 and 2014 to temporarily reserve the Red Cross National Society names at issue as well as the names and acronyms of IGOs that appear on the list provided by the GAC to ICANN in March 2013. These interim protections are to remain in place until the differences between the GNSO recommendations and the GAC advice are reconciled.
- The Board's October 2020 resolution initiating the Board-GAC Consultation Process clarified that the Board will continue to defer final action on the remaining recommendations from this PDP pending the outcome of the consultation process.

Title:	IRT: Specific Curative Rights Protections for Intergovernmental Organizations (EPDP_SCRP_IGO_IRT)
Description & Scope:	Following the ICANN Board's adoption of all the EPDP's consensus recommendations, ICANN staff was directed to begin implementation of the curative rights protections for IGOs. The GNSO Council initiated this work to consider "whether an appropriate policy solution can be developed that is generally consistent with the first four recommendations from the GNSO's IGO-INGO Access to Curative Rights PDP and: ● accounts for the possibility that an IGO may enjoy jurisdictional immunity in certain circumstances; ● does not affect the right and ability of registrants to file judicial proceedings in a court of competent jurisdiction; ● preserves registrants' rights to judicial review of an initial [Uniform Domain Name Dispute Resolution Policy or Uniform Rapid Suspension decision; and ● recognizes that the existence and scope of IGO jurisdictional immunity in any particular situation is a legal issue to be determined by a court of competent jurisdiction." The GNSO Council originally created a Work Track within the RPMs PDP WG, based on the Council referral of recommendation 5 from the IGO-INGO Curative Rights Protection Mechanisms PDP WG Final Report. The Addendum to the RPMs PDP Charter was adopted by the GNSO Council in January of 2020. On 19 August 2021, the GNSO Council initiated the Expedited Policy Development Process (EPDP) on Specific Curative Rights Protections for IGOs to enable the policy development of the IGO Work Track to continue without delay, considering the step to be an entirely procedural action and having no impact on the scope of work.

Title:	GGP: New gTLD Subsequent Procedures - Applicant Support (SubPro_GGP)

Description & Scope:	The ICANN org Operational Design Phase (ODP) Team identified a concern related to the Applicant Support topic, where the SubPro Final Report envisioned that a dedicated Implementation Review Team (IRT) would be responsible for performing substantive work; the ODP Team submitted a set of questions to the GNSO Council, asking whether the work required to implement Applicant Support may be beyond the scope envisioned for IRTs. The GNSO Council responded to the ODP Team, communicating that it would explore avenues to perform work as envisaged by the SubPro Final Report. The GNSO Council discussed and agreed that the GNSO Guidance Process (GGP) would serve as an appropriate mechanism in order to provide additional guidance to support eventual implementation efforts. The GNSO Council further agreed that the GGP should be limited to the single topic of Applicant support, with an allowance to add additional scope to the GGP subject to Council vote. The GGP Initiation Request was refined following input from Councilors and an updated GGP Initiation Request was shared with the GNSO Council on 24 August 2022. On 25 August the GNSO Council approved the GGP Initiation Request.
