# 2 - Issue Scoping

Title:

Diacritics in Latin Scripts of Internationalized Domain Names (IDN\_DLS)

Scope:

The GNSO Council is exploring the circumstance when an ASCII gTLD and the Latin diacritic version of the gTLD are not variants of each **Description &** other AND may be found to be visually similar to each other. The issue is theoretically possible for any existing ASCII or Latin IDN gTLD and is essentially infinite for future applied-for ASCII or Latin IDN gTLDs. The Council has requested an Issue Report on this topic and once received, will determine next steps.

# **Status/Health Rationale:**

• The project Status is "On Schedule" at project start of 16 May 2024 with a Health indicator of "On-Target".

### **Current Activities:**

• ICANN org to develop an Issue Report.

HEALTH:

### **Planned Activities:**

• None for this period.

### **Open Issues & Risks:**

• None for this period.

# Completed in prior period(s):

• The GNSO Council <u>resolved</u> to request an Issue Report for Diacritics in Latin Script at its May 2024 meeting.

# 2 - Issue Scoping

### Title:

### Standing Predictability Implementation Review Team (SPIRT-CDT)

The Drafting Team is expected to develop a draft Charter for the SPIRT, which is a group recommended in the new gTLD Subsequent Procedures Final Report. The Drafting Team's only task is to develop the draft Charter for the SPIRT, with the Charter being subject to GNSO Council approval.

# Description & Scope:

As background and for context, the SPIRT will utilize an output called the Predictability Framework, which will be an output of the implementation effort for New gTLD Subsequent Procedures as developed by ICANN org, in coordination with the Implementation Review Team (IRT). This Drafting Team will NOT be responsible for developing the Predictability Framework, but will be responsible for the limited task of determining how the SPIRT will utilize the Predictability Framework, by preparing the draft Charter.

In developing the draft Charter, the Drafting Team will be expected to consider elements such as the composition of the SPIRT, detailing how issues are raised to the SPIRT procedurally, defining operating principles and decision-making, and other important aspects to support the proper functioning of the SPIRT. The New gTLD Subsequent Procedures Final Report included an <u>annex</u> that provides detailed guidance on how the SPIRT should operate. The content included in this annex should serve as the starting point for the Drafting Team in developing the draft Charter, but the Drafting Team may determine that improvements can be made to what is suggested in that annex.

The SPIRT Charter is a requirement for establishing the SPIRT. However, the SPIRT and the Predictability Framework are by definition, not intended to operate until the AGB is approved by the ICANN Board.

Prior period % Complete	74%	

### **Status/Health Rationale:**

The project <u>Status</u> is "On Schedule" at project start of 18 Jan 2024 with a <u>Health</u> indicator of "On-Target".

### **Current Activities:**

• Review of and deliberations on the draft SPIRT charter.

### **Planned Activities:**

 Drafting team agreement on draft SPIRT charter and delivery to the GNSO Council for its consideration.

### **Open Issues & Risks:**

 The charter drafting team is concerned by limited participation among certain represented groups that may result in delayed delivery of the draft charter. A note was <u>sent</u> to the GNSO Council outlining this issue and encouraging groups to confirm their participation.

### <u>Completed in prior period(s)</u>:

Developed first draft of SPIRT charter.

# 2 - Issue Scoping

### Title: Registration Data Accuracy Scoping Team (RDA\_ST)

Description & Scope:

The GNSO Council adopted a proposal on 21 October 2020 which recommended that a Scoping Team address the effects of GDPR on Registration Data accuracy requirements and the Whois Accuracy Reporting System (ARS), stating, "a scoping team would be tasked to, 'facilitate community understanding of the issue; assist in scoping and defining the issue; gather support for the request of an Issue Report, and/or; serve as a means to gather additional data and/or information before a request [for an Issue Report] is submitted'. On 22 July 2021, the GNSO Council confirmed the <u>formation of and instructions</u> to the Accuracy Scoping Team. The Scoping Team will be tasked to consider a number of accuracy-related factors such as the current enforcement, reporting, measurement, and overall effectiveness of accuracy-related efforts. These considerations are expected to help inform its deliberations and the development of recommendations to the GNSO Council on whether any changes are recommended to improve accuracy levels, and, if so, how and by whom these changes would need to be developed (for example, if changes to existing contractual requirements are recommended, a PDP or contractual negotiations may be necessary to effect a change).

Address assignments 4 (On-hold)	Jul-22	
Send final recommendations to GNSO Council (On-hold)	Sep-22	
Prior period % Complete	78%	

### **Status/Health Rationale:**

This <u>Status</u> of this project was placed "On-hold" 31 Aug 2022 with the delivery of Assignments #1 & #2 awaiting further instructions from the GNSO Council. The <u>Health</u> remains as "In-Trouble" due to the yet to be delivered Final Report of all four assignments based on a variety of un-planned dependencies to complete its work.

### **Current Activities:**

• Council to revisit the status of this deferral and the associated events during ICANN80.

### **Planned Activities:**

- Once the DPA negotiations are completed, and/or the publication of the INFERMAL study, the GNSO Council will review the <u>formation and instructions</u> to the Scoping Team to ensure these are still fit for purpose, taking into account the summary results of the survey that was conducted amongst Scoping Team members to better understand the issues encountered.
- Council to determine timing and process for searching for a new Chair for the Scoping Team.

### **Open Issues & Risks:**

- Work of the Scoping Team is paused while it awaits the completion of DPA negotiations. Based on its assessment of the scenarios, ICANN org noted it does not have a legitimate purpose that is proportionate, i.e., not outweighed by the privacy rights of the individual data subject(s) to request Contracted Parties to provide access to individual records as well as bulk access to registration data in order to review the accuracy of registration data. A response from the EDPB regarding the scenarios is still outstanding.
- <u>Project Change Request</u> and project schedule revision will be required prior to the Scoping Team restarting its work.

# Completed in prior period(s):

- On 19 October 2023, ICANN org provided an <u>update</u> on Registration Data Accuracy efforts, regarding accuracy research proposals and its efforts following ICANN73. The GNSO Council discussed the update during its meeting on 16 November 2023. The Council discussed the limitations noted in the report and tentatively agreed that now did not seem like the appropriate time to revisit work.
- During its February 2024 meeting, the GNSO Council <u>voted</u> to defer consideration of the Scoping Team's recommendations for six months or until the passage of a "significant" event, which could include the publication of the data protection agreement between ICANN org and contracted parties, publication of the INFERMAL (Inferential Analysis of Maliciously Registered Domains) study, or implementation of NIS2. Prior to its vote, the Council agreed to revisit the status of this deferral and the associated events in approximately three months, e.g., during ICANN80.

### 3 - Initiation

### Title: WHOIS Procedure Implementation Advisory Group (WPIAG)

**Description &** Scope: The ICANN Procedure For Handling WHOIS Conflicts with Privacy Law Implementation Advisory Group (WHOIS Procedure IAG) is tasked to provide the GNSO Council with recommendations on how to address the comments and input that has been received in response to the public comment forum on the Revised ICANN Procedure for Handling WHOIS Conflicts with Privacy Law: Process and Next Steps.

4) Call for Volunteers for WPIAG?	TBD	
5) Council initiate EPDP to amend or terminate policy?	TBD	
Prior period % Complete	0%	

### **Status/Health Rationale:**

• This effort has been placed "On-Hold" and yet to start as a formal project.

### **Current Activities:**

None at this time.

### **Planned Activities:**

- ICANN org to work with contracted parties on the data protection agreement from EPDP-P1 implementation prior to further work on the WHOIS Conflicts Procedure.
- GNSO Council to consider the proposal, if and when available, and determine next steps according to the go-forward plan.

### **Open Issues & Risks:**

This issue remains outstanding since the GNSO Council resolved to take step 1 of the go-forward plan in October of 2020.

# **Completed in prior period(s):**

- The GNSO Council <u>adopted</u> the <u>charter</u> for the ICANN Procedure For Handling WHOIS Conflicts with Privacy Law Implementation Advisory Group (WHOIS Procedure IAG) during its meeting on 22 February 2018.
- The Council passed a <u>consent agenda resolution</u> to begin with the first step of the go-forward plan for "ICANN org, in consultation with contracted parties, to draft a proposal for a modification to the existing Procedure based on its past experience with both the WHOIS Conflicts Procedure and the registrar data retention waiver process."
- The Council sent a letter to GDS Staff, informing GDS of ICANN org's action item based on the Council's consent agenda resolution, requesting ICANN org, in consultation with contracted parties, to consider possible amendments to the procedure in light of privacy regulations.
- ICANN org provided an update in March 2021, a second update in June 2021, and both updates noted ICANN org has been working with Contracted Parties to prepare a proposal for a modification to the existing ICANN Procedure for Handling WHOIS Conflicts with Privacy Law.
- In September 2021, ICANN org provided a follow-on update to the Council that it will await the conclusion of data protection agreement work related to the EPDP-P1 implementation prior to further work on the WHOIS Conflicts Procedure. To date, DPA negotiations are still outstanding.

# 4 - Working Group

Title: EPDP - Internationalized Domain Names - Phase 2 (EPDP\_IDN\_P2)

Description & Scope:

On 20 May 2021, the GNSO Council passed a resolution to initiate the Expedited Policy Development Process (EPDP) on Internationalized Domain Names and adopt its charter. The EPDP Team is tasked with providing the GNSO Council with policy recommendations on: 1) the definition of gTLDs and the management of variant labels; and 2) how the IDN Implementation Guidelines, which Contracted Parties are required to comply with, should be updated in the future.

### Composition:

Jan-24 Jun-24

Title: GGP: New gTLD Subsequent Procedures - Applicant Support (SubPro\_GGP)

Description & Scope:

The ICANN org Operational Design Phase (ODP) Team identified a concern related to the Applicant Support topic, where the SubPro Final Report envisioned that a dedicated Implementation Review Team (IRT) would be responsible for performing substantive work; the ODP Team <u>submitted a set of questions</u> to the GNSO Council, asking whether the work required to implement Applicant Support may be beyond the scope envisioned for IRTs. The GNSO Council <u>responded</u> to the ODP Team, communicating that it would explore avenues to perform work as envisaged by the SubPro Final Report. The GNSO Council discussed and agreed that the GNSO Guidance Process (GGP) would serve as an appropriate mechanism in order to provide additional guidance to support eventual implementation efforts. The GNSO Council further agreed that the GGP should be limited to the single topic of Applicant support, with an allowance to add additional scope to the GGP subject to Council vote. The GGP Initiation Request was refined following input from Councilors and an <u>updated GGP Initiation Request</u> was shared with the GNSO Council on 24 August 2022. On 25 August the GNSO Council <u>approved</u> the GGP Initiation Request.

Title: PDP: New gTLD Subsequent Procedures (SubPro)

**Description &** Scope: This WG was tasked with calling upon the community's collective experiences from the 2012 New gTLD Program round to determine what, if any changes may need to be made to the existing 2007 Introduction of New Generic Top-Level Domains policy recommendations. Those policy recommendations will remain in place for subsequent rounds unless modified via a PDP. The work of this WG followed the efforts of the New gTLD Subsequent Procedures Discussion Group (DG), which identified a set of issues for a future PDP-WG to consider in their deliberations.

# **Current Activities:**

- For the majority of the SubPro recommendations, implementation efforts, led by ICANN org, are underway and will continue according to the communicated work plan.
- Further work to amend the Supplemental Recommendations related to Topic 24: String Similarity Evaluation, in light of the ICANN org straw person on singular/plural shared with the Council.

### **Planned Activities:**

• None for this period.

### **Completed in prior period(s):**

- Council <u>adoption</u> of the Supplemental Recommendations on 18 April.
- Council remanded Topic 24 to the Small Team Plus for consideration.

### Title: EPDP: Standardized System for Access & Disclosure – Phase 2 (EPDP\_P2)

**Description &** Scope: Following the adoption by the ICANN Board of a temporary specification on gTLD Registration Data to enable contracted parties to continue to comply with existing ICANN contractual requirements and with community-developed policies as they relate to WHOIS, while also complying with the European Union's General Data Protection Regulation (GDPR), a one-year policy development process was initiated to confirm whether or not the temporary specification should become a consensus policy. The GNSO Council adopted the Final Report during its Special Council meeting on 4 March 2019 and provided its non-objection to the commencement of Phase 2. The scope for EPDP Phase 2 includes (i) discussion of a system for standardized access/disclosure to nonpublic registration data (SSAD), (ii) issues noted in the Annex to the Temporary Specification for gTLD Registration Data ("Important Issues for Further Community Action"), and (iii) issues deferred from Phase 1, e.g., legal vs natural persons, redaction of city field, et. al.

Following the review of the SSAD Operational Design Assessment (ODA) and subsequent conversations between the ICANN Board and the GNSO Council, it was decided to proceed with a "proof of concept" approach to help inform a decision on how to proceed with the EPDP Phase 2 Final Report recommendations for an SSAD. During its meeting on 27 February 2023, the ICANN Board directed ICANN org to proceed with the implementation of the Registration Data Disclosure Service (RDRS).

ICANN Board adoption of consensus recs.	Jun-26	

### **Current Activities:**

ICANN org will publish updated metrics on a monthly basis, and the RDRS Standing Committee will meet at least once per month to review metrics.

### **Planned Activities:**

- Following the implementation of the RDRS, the RDRS Standing Committee will review the data resulting from RDRS and advise the Council on how this information helps inform a decision on how to proceed with the SSAD related recommendations.
- The RDRS Standing Committee will hold a session at ICANN80, during which it will review six months worth of data and begin a trend analysis.
- The Board will consider the SSAD-related recommendations (recs. 1-18) of the Final Report. Note that the GNSO Council confirmed that pending the implementation and subsequent running of the RDRS for a period of up to two (2) years, the SSAD recommendations should remain paused for consideration by the ICANN Board.

### **Completed in prior period(s):**

- The Registration Data Request Service ("RDRS") Standing Committee has reviewed the available metrics and has been working with ICANN org on suggested improvements to the RDRS.
- The Council adopted the charter for the RDRS Standing Committee to help inform the next steps on the SSAD policy recommendations. The GNSO Secretariat is in the process of reaching out to confirm membership for the Standing Committee which took over from the small team as soon as the RDRS was launched.

Title: PDP: Protection of International Organization Names in All gTLDs (IGO\_INGO2)

Description & Scope:

This WG was tasked to provide the GNSO Council with policy recommendations as to whether there is a need for special protections at the top and second level in all gTLDs for the names and acronyms of International Governmental Organizations (IGOs) and international non-governmental organizations (INGOs) receiving protections under treaties and statutes under multiple jurisdictions, specifically including the Red Cross/Red Crescent Movement (RCRC) and the International Olympic Committee (IOC).

Effective Date of Protection of IGO and INGO Identifiers in All gTLDs Policy.	Aug-18	<b>&gt;</b>
ICANN Board adoption of remaining consensus recs.	Jun-26	

# **Current Activities:**

- Implementation of the INGO Claims system.
- Board consideration for how to remove reservation of IGO acronyms and certain specific Red Cross identifiers.
- Board consideration for how to resolve outstanding advice through the consultation process
- <u>Implementation Page</u> for remaining items to be implemented.

### **Planned Activities:**

• None for this period.

# **Completed in prior period(s):**

- In April 2014 the Board voted to adopt those of the GNSO's recommendations, approved unanimously by the GNSO Council in November 2013, that are not inconsistent with GAC advice received on the topic. Following work by an Implementation Review Team (IRT), the finalized Consensus Policy on IGO and Red Cross, International Olympic Committee and INGO names was announced in January 2018, with an effective date of August 2018 for most aspects of the Policy.
- For those policy recommendations that are inconsistent with GAC advice (i.e. protection of IGO acronyms and certain specific Red Cross identifiers), the Board passed a number of resolutions in 2013 and 2014 to temporarily reserve the Red Cross National Society names at issue as well as the names and acronyms of IGOs that appear on the list provided by the GAC to ICANN in March 2013. These interim protections are to remain in place until the differences between the GNSO recommendations and the GAC advice are reconciled.
- The Board's October 2020 <u>resolution</u> initiating the Board-GAC Consultation Process clarified that the Board will continue to defer final action on the remaining recommendations from this PDP pending the outcome of the consultation process.
- ICANN org staff provided a <u>status update</u> of the IGO Program at ICANN79.
- The ICANN Board passed a <u>resolution</u> at its meeting on 5 May 2024, accepting the GAC's advice from ICANN76 to maintain the current moratorium on second level registrations which match the temporarily-reserved acronyms of those International Governmental Organizations (IGOs) on the list the GAC had submitted to ICANN in 2013, until implementation of the Board-adopted GNSO policy recommendations concerning IGO curative rights is complete.
- ICANN Org submitted a <u>proposed timeline</u> for implementation and eventual release of the remaining IGO acronyms.

### 7 – Implementation Title: IRT: Specific Curative Rights Protections for Intergovernmental Organizations (EPDP\_SCRP\_IGO\_IRT) Following the ICANN Board's adoption of all the EPDP's consensus recommendations, ICANN staff was directed to begin implementation of the curative rights protections for IGOs. The GNSO Council initiated this work to consider "whether an appropriate policy solution can be developed that is generally consistent with the first four recommendations from the GNSO's IGO-INGO Access to Curative Rights PDP and: accounts for the possibility that an IGO may enjoy jurisdictional immunity in certain circumstances; does not affect the right and ability of registrants to file judicial proceedings in a court of competent jurisdiction; preserves registrants' rights to judicial review of an initial [Uniform Domain Name Dispute Resolution Policy or Uniform Rapid **Description &** Suspension decision; and Scope: recognizes that the existence and scope of IGO jurisdictional immunity in any particular situation is a legal issue to be determined by a court of competent jurisdiction." The GNSO Council originally created a Work Track within the RPMs PDP WG, based on the Council referral of recommendation 5 from the IGO-INGO Curative Rights Protection Mechanisms PDP WG Final Report. The Addendum to the RPMs PDP Charter was adopted by the GNSO Council in January of 2020. On 19 August 2021, the GNSO Council initiated the Expedited Policy Development Process (EPDP) on Specific Curative Rights Protections for IGOs to enable the policy development of the IGO Work Track to continue without delay, considering the step to be an entirely procedural action and having no impact on the scope of work. JAN 2020 - Project Initiated by GNSO Council (Charter Addendum) AUG 2021 - EPDP Charter adopted SEP 2021 - Initial Report for public comment APR 2022 - Sent Final Report to GNSO Council **Key Milestones:** JUN 2022 - GNSO Council adoption of consensus recommendations NOV 2022 - Public Comment for Board consideration APR 2023 - ICANN Board adoption of the EPDP's consensus recommendations **GNSO Policy Page Project Status Implementation Project Page Information:** Wiki Space (TBD) M. 7 – Implementation				
Title:	IRT: Curative Rights Protections for IGO/INGOs (IGO_CRPM_IRT)			
Description & Scope:	Following the ICANN Board's <u>adoption</u> of the four consensus recommendations that the GNSO Council approved, ICANN staff was directed to begin implementation of the curative rights protections for IGOs.  The WG was chartered in June 2014 to provide the GNSO Council with recommendations as to whether to amend the UDRP and URS to allow access to and use of these mechanisms by IGOs and INGOs and, if so in what respects or whether a separate, narrowly-tailored dispute resolution procedure that takes into account the particular needs and specific circumstances of IGOs and INGOs should be developed.

Title:	IRT: Rights Protection Mechanisms in All gTLDs (RPM_P1_IRT)
Description & Scope:	This WG was chartered in March 2016 to review all the RPMs that have been developed by ICANN. The PDP is being conducted in two phases, beginning with the RPMs developed for the 2012 New gTLD Program, with the 1999 Uniform Domain Name Dispute Resolution Policy to follow in Phase Two. By the end of its work, the WG will be expected to also have considered the overarching issue as to whether or not the RPMs collectively fulfill their purposes or whether additional policy recommendations will be necessary, including to clarify and unify the policy goals. This IRT was formed to implement the consensus recommendations approved by the ICANN Board.
Key Milestones:	<ul> <li>FEB 2016 - Project <u>Initiated</u> by GNSO Council</li> <li>MAR 2020 - <u>Initial Report</u> for public comment</li> <li>NOV 2020 - Sent <u>Final Report</u> to GNSO Council</li> <li>JAN 2021 - GNSO Council <u>adoption</u> of consensus recommendations</li> <li>JAN 2022 - ICANN Board <u>adoption</u> of consensus recommendations</li> </ul>

Title:	IRT: Registration Data Policy Implementation - Phase 1 (EPDP_P1_IRT)
Description & Scope:	This IRT was formed to support the ICANN staff on the implementation of the GNSO's consensus policy recommendations for Registration Data Services, as approved by the ICANN Board. The implementation includes 29 recommendations from EPDP Phase 1 and 4 recommendations from EPEP Phase 2 as well as the Supplemental Recommendation 12 that was added to the scope in March 2022.  Following the ICANN Board's adoption of the Temporary Specification for gTLD Registration Data to enable contracted parties to continue to comply with existing ICANN contractual requirements and community-developed policies as they relate to registration directory services, the GNSO Council initiated a one-year policy development process to confirm whether or not the Temporary Specification should become a consensus policy, and whether it provided an enduring framework for complying with the European Union's General Data Protection Regulation (GDPR).
Key Milestones:	<ul> <li>JUN 2018 - Project <u>Initiated</u> by GNSO Council</li> <li>DEC 2018 - <u>Initial Report</u> for <u>public comment</u></li> <li>FEB 2019 - Sent <u>Final Report</u> to GNSO Council</li> <li>FEB 2019 - GNSO Council <u>adoption</u> of consensus recommendations</li> <li>MAY 2019 - ICANN Board <u>adoption</u> of consensus recommendations + <u>scorecard</u></li> <li>FEB 2024 - ICANN org <u>publishes</u> <u>Registration Data Policy</u></li> </ul>

Title:	IRT: Privacy & Proxy Services Accreditation Issues PDP Recommendations (PPSAI_IRT)
Description & Scope:	The Registrar Accreditation Agreement (RAA), the contract governing the relationship between ICANN and accredited registrars, has been in place since 2001. The Board initiated negotiations for a new RAA in October 2011, and requested an Issue Report from the GNSO at the same time. The final version of the new RAA was approved by the Board in June 2013, thereby signifying that the RAA negotiations were concluded. Per the Board's 2011 request, the remaining issues, which were identified as those relating to privacy & proxy services and their accreditation, were examined in a PDP. This IRT was formed to implement the consensus recommendations approved by the ICANN Board.
Key Milestones:	<ul> <li>OCT 2013 - Project <u>Initiated</u> by GNSO Council</li> <li>MAY 2015 - <u>Initial Report</u> for <u>public comment</u></li> <li>DEC 2015 - Sent <u>Final Report</u> to GNSO Council</li> <li>JAN 2016 - GNSO Council <u>adoption</u> of consensus recommendations</li> <li>AUG 2016 - ICANN Board <u>adoption</u> of consensus recommendations</li> </ul>

Submit Assignment #4 to GNSO Council (adopted)	Mar-23	<b>~</b>
Submit Assignment #6 to GNSO Council (rejected)	Sep-23	<b>~</b>
Review of CCOICI Pilot	May-24	<b>~</b>
Implement Assignment #4	Aug-24	
Implement Assignment #6	Canceled	<b>~</b>
Submit revised CCOICI charter to GNSO Council	Oct-24	

### **Current Activities:**

- Staff to develop an initial red-line draft of the current charter.
- CCOICI to review and revise the charter, making it a permanent standing committee.

### **Planned Activities:**

CCOICI Assignment #4 - Working Group Self-Assessment (WGSA): GNSO Staff Support to present the changes as outlined in the Recommendations Report and review survey contents as built in Survey Monkey.

### **Open Issues & Risks:**

• None at this time.

### **Completed in prior period(s)**:

- Presented a report of the CCOICI Pilot survey results to the GNSO Council.
- GNSO Council tasked the CCOICI to revise its charter into a permanent standing committee.

# **Other Projects**

Title: Geo Regions Review Community-wide Working Group

Description & Scope:

This Board-chartered cross community WG considered the need to develop and/or update the definition and applications of ICANN's Geographic Regions.

### Milestones/Work plan (link):

Milestone/Task	Date	
Project Charter	Jun-09	<b>~</b>
Issue report for public comment	Jun-09	<b>~</b>
Draft Final report for public comment	Sep-11	<b>~</b>
Send <u>final report</u> to ICANN Board	Jun-13	<b>~</b>
Issue public comment for Board consideration	Jul-13	<b>~</b>
ICANN Board <u>adoption</u> of <u>recommendations</u>	Oct-18	<b>~</b>
Final Implementation	Jun-24	

# **Current Activities:**

 This project is On-Hold pending ICANN Org proposal of an implementation plan, following Board approval of the <u>WG recommendations</u> in October 2018. Further, this project is likely to be impacted by the timing and implementation of CCWG Accountability WS2 recommendations.

### **Planned Activities:**

• None for this period.

### **Completed in prior period(s):**

- The Board adopted the Final Report during its meeting on 25 October 2018 and "directs the ICANN organization to implement those recommendations in a manner that aligns with the Board's expectations as outlined in the mapping document". Initially, ICANN Org staff had expected to begin implementation planning as directed by the Board in 2019; however, following the Board adoption of the CCWG WS2 recommendations, it is likely that implementation planning for this project will be integrated into that for WS2.
- This project is On-Hold pending ICANN Org proposal of an implementation plan, following Board approval of the WG recommendations in October 2018. Further, this project is likely to be impacted by the timing and implementation of CCWG Accountability WS2 recommendations.
