Group				ICANN70										
Full WG	Complete principle section, first reading criteria	Second reading criteria	Complete Criteria, Processes & procedures. Prepare update to community	Update to community, Second reading processes and procedures	Adoption (1st and 2nd reading De-selection) Update and reading Processes and procedures re de-selection	Prepare Update community	Update community, Update criteria, processes and procedures re variant maangement(Adoption WG variant management	Update criteria, processes and procedures re variant maangement(Adoption WG variant management	Continue update criteria, processes and procedures re variant maangement(Adoption WG variant management	Continue up date criteria, processes and procedures prep update fro community	update criteria, processes and procedures re confusing similarity	Finalise Draft Initial report,	Public comment	
SUB Group De-slection		Constitute De-slection, call fro volunteers, nomination chair	First reading de-slection	Second reading, de-slection	Update de-slection if required									
Sub-group variant management				Call for Variant management: call for volunteers. Appointment Chair Staff Prep Variant Management	Sub-group Readings Variant Management	Sub-group Readings Variant Management	Update variant management if required							
Sub-group Confusing simialarity							Set-up confusing simiality su-group, call for volunteers, chair nomination	Start Confusing similarity sub-group	Readings Confusing similarity	Readings Confusing similarity				
Assumptions	<p>The WG meets every two weeks on Tuesday</p> <p>Sub-groups meet every two weeks on Tuesday</p> <p>Sub-groups do NOT work in parallel</p> <p>The De-eslection process and rcedures are defined in PDP3 (retirement ccTLDs)</p>													
Open question	Does PDP4 need to determine/ decide on applicability of review mechanims pertaining to decisions on selection/de-slection of strings?
