RE: ALAC Correspondence Regarding Mozilla DNS over HTTPS (DoH) and Trusted Recursive Resolver (TRR) Comment Period

Maureen Hilyard  
At-Large Advisory Committee (ALAC) chair

Dear Maureen,

Thank you for your letter of 3 December 2020 referencing the [Mozilla DNS over HTTPS \(DoH\) and Trusted Recursive Resolver \(TRR\) Comment Period](#) and encouraging the ICANN org Office of the Chief Technology Officer (OCTO) to comment. After reviewing the comment documentation, OCTO has determined it is appropriate to provide input to Mozilla on the general policy implications of encrypted DNS and modern best practices for recursive resolvers (such as the use of DNSSEC validation).

OCTO is planning to submit a comment by the 4 January 2021 deadline.

Thank you again for bringing this comment opportunity to our attention.

Sincerely,

David Conrad  
Chief Technology Officer  
ICANN
