

# **EDPD**

# **Status Update**

**Alan Greenberg**

08 March 2021

# HISTORY

- Privacy legislation in various jurisdictions
- European General Data protection Regulations
  - Effective May 2018 – Penalties!
  - Complex & expensive
  - Unavoidable
- ICANN Temporary Specification
  - Interim policy
  - 1 year life-time

# Expedited Policy Development Process

## Mandate

- Develop new policy to replace Temp. Spec.
- Develop a methodology for those who need additional access to get it

# EPDP Phase 1 Results

- Phase 1
  - New policy eliminating some fields
  - Redacting all contact fields
  - Effective erasure of Organization Field
  - Allow but not require Legal/Natural distinction (to be further discussed)
  - Email contact anonymization – unclear status (to be further discussed)
  - Accuracy issue not resolved (to be further discussed)
  - No geographic differentiation
  - Temp Spec rules to continue for several months (after May 2019) during implementation
    - Still not implemented

# EPDP Phase 2 Results

- SSAD – Standardized System for Access/Disclosure
  - Centralized portal for requests
  - Expensive
  - Almost no requests satisfied by portal
    - Relayed to registrar (or registry)
    - Therefore not uniform handling
  - Probably no chance for further evolution without additional PDPs
  - L/N, Email and Accuracy not addressed

# EPDP Phase 2A

Addressing:

- Legal/Natural
- Email anonymization

# EU Revised Directive on Security of Network and Information Systems (NIS2)

- Proposal currently out for public comment
- EU Parliament
- Member states for law enactment
- Many aspects but including identifying Domain registration data and DNS as critical functions

# NIS2

- Registration Data
  - Accuracy
  - Must publish non-personal data
- DNS
  - All aspects critical
- Timing
  - Perhaps through EU Parliament this year or early-mid next year
  - Member state laws within 3 years

# Discussion
