EPDP PHASE 2A TIMELINE

PROPOSED SCENARIO FOR LEGAL VS NATURAL DIFFERENTIATION

ICANN ORG LIABILITY RISK

How does ICANN org see its liability risk to enforce mandatory differentiation of legal v. natural persons? For example, the risk for a registry is for 1 zone, for ICANN, the risk is likely for thousands of contracted parties.

Answer:

At the moment, it's not clear whether a Consensus Policy requirement, alone and absent ICANN's actual involvement in processing contemplated under any such Policy, would make ICANN a controller for this processing.

THANK YOU - QUESTIONS?
