

Hello and good day to all!

I humbly accept the nomination for the role At-Large representative of APRALO to the NomCom. Growing my experiences annually brought me to know and be acquainted with ICANN SOs and ACs. I know that I am not a familiar face in this kind of stage but given the opportunity, I will give my utmost commitment and do what is expected from the role. My eagerness to learn, cooperation and willingness to communicate will be my instruments to perform the duties intended for the position.

I have been volunteering as part of selection of several fellowship and ambassadorship committees across the Asia Pacific region and the global arena. Professionally, I have been evaluating applicants for positions within our institution not only in the academic environment but also giving recommendations from other fields as well.

Thank you for taking the time to read my statement of interest and for considering me as for the position.

Yours truly,  
Aris Ignacio
