

Emerging trends in the ccTLD landscape in Africa

AfTLD acts as a focal point for all the African TLDs Managers, to discuss matters of policy that affect ccTLDs globally and then to present the group's position as one voice.

Company Structure and owner ship

- Government owned structure 45 %
- University owned structure 12 %
- Privately owned companies 26 %
- Public Private Partnership 17 %

Support for EPP : - 58 % of the ccTLD's

Additional Facts

- Most ccTLDs that are based on the Public Private Partnership approach are self sustainable and account for 90 % of ccTLD registrations in Africa.
- Focus in the region is shifting towards marketing. Technical challenges have been resolved; we welcome more partners to work with us.
- Efforts are underway to develop a common payment gateway
- Efforts are underway to develop a ccTLD observatory to monitor growth of domain name numbers in the ccTLDs.
- ccTLDs that support EPP account for 90 % of domain name registrations across African ccTLDs.
- Most parts of the continent grappling with Infrastructure challenges which has hindered growth of the domain name industry.
- A number of ccTLDs undergoing transition as governments assume role of regulator as opposed to ccTLD Manager eg **.BF, .BJ**

Thank you
