IGLC | Wed, 2 June | 6 UTC (90 min.)

1. Welcome
2. Administrative announcements
   a) Action items previous meeting (none)
3. Is the IGLC fit for purpose?
   a) Reminder phased approach
   b) Continuation identification concrete actions
   c) Start Impact-effort analysis & Next Steps
4. AOB
5. Closure & Next meeting

IGLC strategy development

SOAR analysis

Identifying concrete actions

Impact-effort analysis

Prioritisation Risks

The tendency to underestimate effort

Reasons: mostly [cognitive biases](#)

- [Optimism](#) and wishful thinking, Inaccurate recollection of the time past, similar tasks took,
- Over-focus on execution and completion,
- Underestimation of the occurrence of random events,
- Scaling issues — as the size of the project increases our ability to accurately project its duration further decreases.

The tendency to overestimate impact

The two main contributing factors are:

- No clear metrics — often whether a project or task were successful or not is a matter of interpretation because no success criteria were specified in advance.
- Tendency to remember our good predictions and forget the bad ones (or attribute them to others).

ICANN71 ccNSO Block Schedule

UTC	Mo, 14 June	Tue, 15 June	Wed, 16 June	Thu, 17 June	Fri, 18 June
Block 1 (60') 07:00-08:00	DNSSEC Workshop	ccNSO MM: Governance Session		SOPC
