

NCAP Discussion Group Weekly Meeting - 4th August 2021

AGENDA:

1. Welcome and roll call
2. Action Item review
3. ITHI Overview (Alain Durand, ICANN and Christian Huitema, Private Octopus)
4. AOB

DISCUSSION:

2. Action Item review

No outstanding action items

3. ITHI Overview (Alain Durand, ICANN and Christian Huitema, Private Octopus)

Alain Durand from the Office of the Chief Technology Officer at ICANN and Christian Huitema from Private Octopus has presented the ITHI project (started in 2017) monitoring the health of the registered identifiers ecosystem, through a set of Identifier Technology Health Indicators (ITHI), or ITHI Metrics. There are eight detailed metrics for which data can be seen on the site dedicated to the ITHI project. The metrics are computed using data captured from various sources including data collected by ICANN projects and traces obtained from participating root DNS servers, authoritative DNS servers, and recursive DNS resolvers. Recently, Office of the Chief Technology Office has published the OCTO-25 document regarding the ITHI project, which includes an entire section dedicated to name collisions.
