Planning For Board Approved Activities

ICANN begins designing the expected implementation work when recommendations are Board approved and prioritized by the planning prioritization process

Key FY24 Planning Assumptions

Planning Prioritization

5-Year (FY24–28) Financial Funding Projections

Funding Projection Approach: Marketplace Horizon Scan

1 Marketplace Horizon Scan

Evaluation of key trends and industry developments that are likely to have a significant impact on supply-side or demand-side conditions, including:

1. Global macroeconomic forecasts and commentary from sources such as the Organization for Economic Co-operation and Development, International Monetary Fund, World Bank, Economist Intelligence Unit, etc.
2. Interviews with contracted parties via a third-party consultant.
3. Performance and guidance from publicly-traded industry participants via investor statements/documents.
4. Recent marketplace developments: actual or expected changes in supply-side and demand-side conditions.
5. Historical transaction data:
 - ◉ Volume of transactions, including new acquisition vs. renewals
 - ◉ Growth pattern of launched strings, in terms of DUMs
 - ◉ In-depth evaluation of both Legacy and New gTLDs
 - ◉ Data escrow records

2 Formulation of Assumptions

3 Forecast Generation

Funding Projection Approach: Formulation of Assumptions

1 Marketplace Horizon Scan

2 Formulation of Assumptions

3 Forecast Generation

Low Funding Scenario

- No new registrar accreditation applications
- Decrease in total number of contracted parties
- Decrease in volume of domain name transactions

Base Case Scenario

- New registrar accreditation applications and terminations largely cancel each other out
- Marginal decrease in total number of contracted parties
- Growth in domain name transactions mirror historical rates & alignment with global Gross Domestic Product (GDP) growth trends

High Funding Scenario

- Growth in new registrar accreditation applications
- Increase in total number of contracted parties
- Stronger than historical average growth rates in domain name transactions & alignment with global Gross Domestic Product (GDP) growth trends

Assumes the retention of the current fixed, transaction-based, and accreditation fees.
Does not include any funding assumptions for New gTLD Subsequent Procedures.

Scenario reflects an assumption of marketplace contraction

Scenario reflects an assumption of steady state of growth in a maturing industry

Scenario reflects an assumption of resurgent marketplace growth

5-Year Operations Funding Projections (FY24–28)

1 Marketplace Horizon Scan

2 Formulation of Assumptions

3 Forecast Generation

- FY24-28 ICANN Operations funding forecast is forecasted to stabilize: the base case Scenario is 1% CAGR over 5 Years
- Funding is projected to decline slightly in the short term and then grow modestly over 5 years

Note: CAGR = Compound Annual Growth Rate; CAGR values cover FY15-22 & FY24–28
 FY15–22 based on audited actuals, FY21–F26 include contributions for SSR Operating Initiative
 In millions, USD; Arithmetic inconsistencies due to decimal rounding

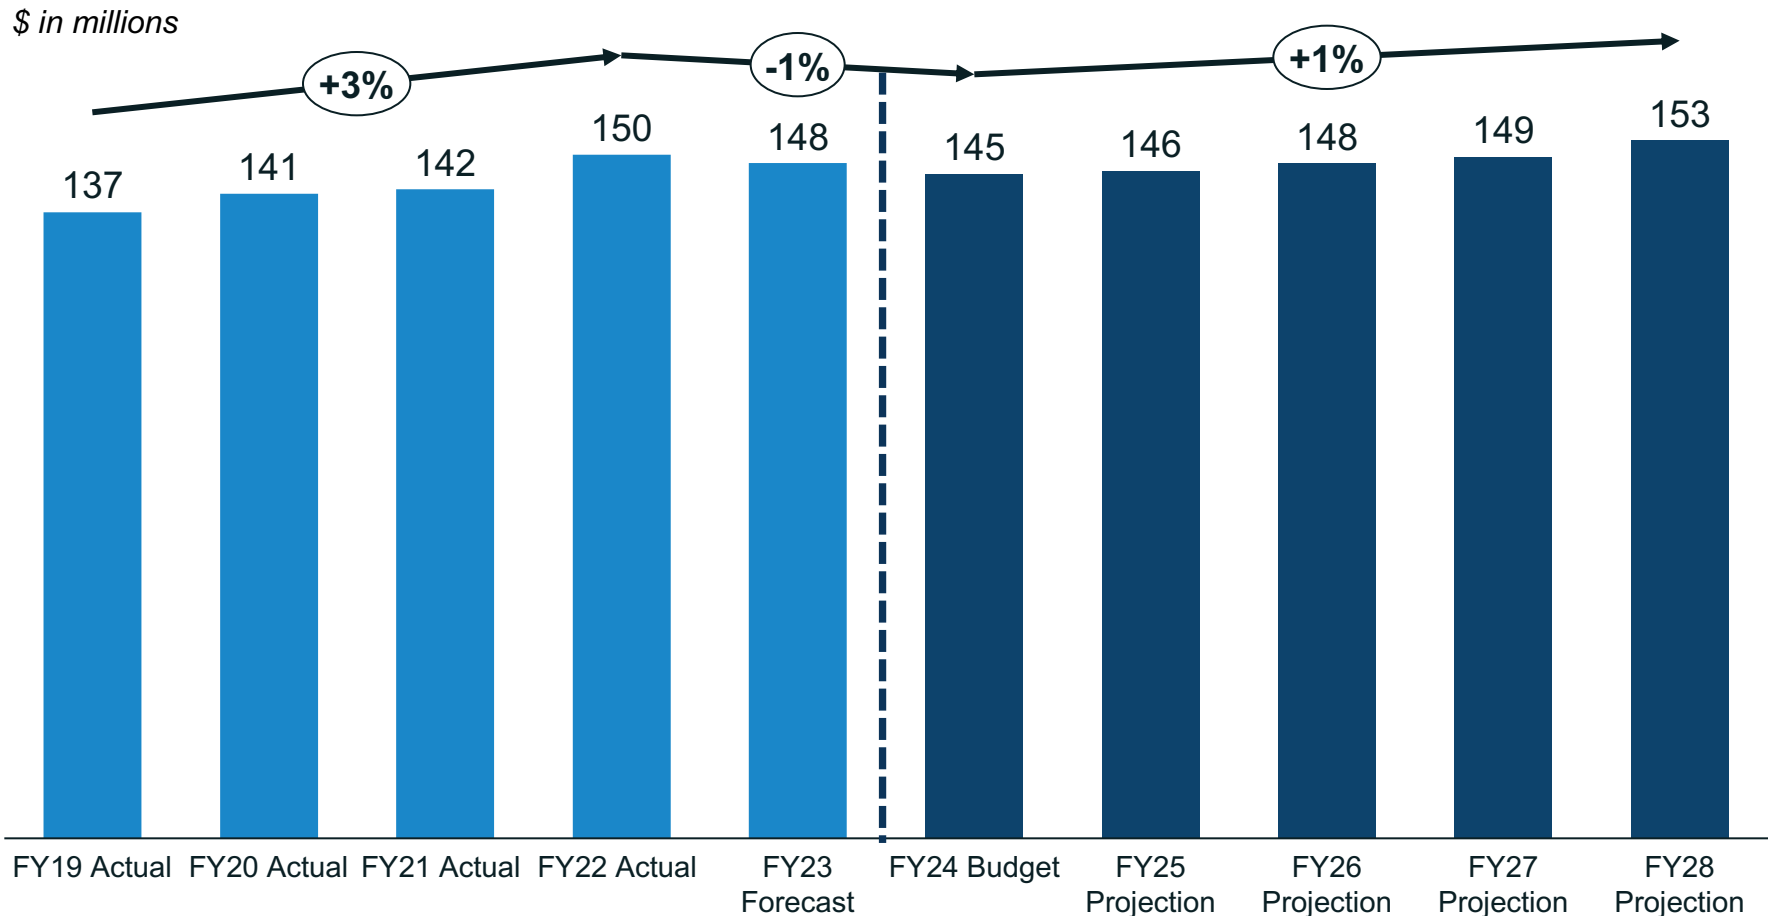

5-Year (FY24–28) Financial Plan

Projected Inflation Impact to ICANN

- ⦿ Inflation has been analyzed and factored into the ICANN Operating Plan and Budget resulting in a slightly negative impact to ICANN's funding and expenses.
- ⦿ ICANN's funding is projected to slightly decline next fiscal year followed by gradual increases as the global economy improves.
- ⦿ ICANN faces inflationary pressures in the form of rising costs, but can reprioritize its costs and activities in order to spend within available funding.
- ⦿ Org will continue to carefully manage expenses and provide diligence when evaluating new and backfill resources, the use of contractors/temporary staff, and other costs such as meetings, travel and external vendors.
- ⦿ **Inflation and the current economic challenges have been reflected in the plans which Org believes are conservative and achievable based on the projected level of funding.**

ICANN Ops Funding Trends and Projections

- ICANN's funding projections include 3 scenarios: Low, Base, and High.
- The Budget is built using the Base Scenario which is believed to be the most likely, this scenario projects a slight decline followed by modest growth.

*Funding projections do not account for a new round of TLD's
Displayed growth rates are Compound Annual Growth Rates (CAGR)
CAGR by Projection Scenario: Low -3%, Base 1% (displayed), High 5%*

Prioritized Specific Review Recommendations

- In February 2022, ICANN org’s Planning team developed a planning prioritization framework to help the ICANN ecosystem prioritize its work within the planning cycle in a manner that is transparent, inclusive, and efficient
- ICANN org has identified 45 recommendations that can be implemented in the next year with incremental funding outside of the annual plan and operating budget
- In November 2022, the ICANN Board passed a resolution that approved ICANN org to utilize US\$5.8 million from the SFICR to fund one-time efforts for prioritized review implementations
- After implementation, all ongoing expenses of the identified recommendations will be part of the ICANN ongoing operations budget

- ICANN org estimates to receive 200 applications and approve ~50 grants
- One-time implementation costs include creating the Grant Program department, applicant helpdesk, program website, Program literature and documentation
- The recurring program operational costs include ICANN staff, awareness and outreach communication campaigns, and outsourced services for an independent evaluation panel
- The program implementation costs will be incurred primarily in FY23, and the operational costs will be incurred during FY23 and FY24.

⁽¹⁾ Contingency represents an amount of budgeted expenses unallocated to specific activities or functions

- Funding is projected to be 3% lower than budget; expense budget has been reduced to account for lower funding which maintains a balanced plan where expenses are equal to funding.
