

Zoom Chat Transcript | IRP-IOT Call – 21 September 2021

00:48:04 Ariel Manoff: I am sorry that I am not participating until now

00:48:08 Flip Petillion: Thx. Will do

00:49:08 Flip Petillion: Good question David

00:50:34 David McAuley (Verisign): Thanks Liz for putting this on the table

00:51:16 Flip Petillion: Am in gsm only now

00:51:31 David McAuley (Verisign): also on list

01:05:07 David McAuley (Verisign): good point, Susan

01:09:55 David McAuley (Verisign): have to step away for just a moment

01:10:53 David McAuley (Verisign): back

01:14:01 Mike Rodenbaugh: Yes that was me

01:14:36 Mike Rodenbaugh: There is a hole in the bylaws.... And relates to IRP timing.

01:15:23 David McAuley (Verisign): Agree on picking up the pace

01:16:54 Mike Rodenbaugh: agree

01:18:18 Bernard Turcotte: usually yes

01:19:02 David McAuley (Verisign): Good - agree that support is needed

01:23:04 David McAuley (Verisign): I agree with that assessment, Susan

01:25:42 David McAuley (Verisign): you might say that he tolled us so

01:30:23 Mike Rodenbaugh: I agree with Kurt. There must be tolling of IRP filing deadline so Ombudsman process can play out, at least in the rare case he actually decides to engage

01:34:25 Mike Rodenbaugh: Publication of minutes cannot be the Start Date, as nobody knows when they are posted except ICANN

01:35:57 Mike Rodenbaugh: If ICANN sends a letter, then that is notice. If ICANN posts a Resolution, that is not notice.

01:38:02 David McAuley (Verisign): Formal Board actions are not the only matters subject to IRP - who knows when an inaction happened?

01:38:24 Mike Rodenbaugh: Nobody except ICANN

01:39:42 Mike Rodenbaugh: The world can't be bound to be watching out for ICANN resolutions or minutes to be posted, as their meetings are haphazardly scheduled and meetings at least historically have been posted whenever ICANN gets around to it

01:41:06 Mike Rodenbaugh: I have seen minutes take more than a month to be posted, many times.

01:42:38 Mike Rodenbaugh: ICANN needs to have an obligation to directly notify directly affected parties, at least where those parties are obvious to ICANN (i.e. re a TLD application)

01:44:19 Malcolm Hutty: This idea of people watching the ICANN web site waiting for minutes is a legacy concept from the old standing rules. Under the new standing rules, an IRP could be filed by someone who had never heard of ICANN until they were harmed.

01:50:57 Mike Rodenbaugh: That's not really a fair statement

01:56:32 Sam Eisner: There is ALREADY more time available than there was prior to 2016

01:56:48 David McAuley (Verisign): Understood, thanks Malcolm

01:59:16 Malcolm Huty: I don't understand Sam's suggestion that RfR isn't sequential with the IRP

01:59:34 Malcolm Huty: Perhaps we can come back to that next time

02:00:24 Bernard Turcotte: bye all

02:00:26 David McAuley (Verisign): Thanks all, good bye
