2 - Issue Scoping

Title:	Registration Data Accuracy Scoping Team (RDA_ST)

Description & Scope:	The GNSO Council adopted a proposal on 21 October 2020 which recommended that a Scoping Team address the effects of GDPR on Registration Data accuracy and the Whois Accuracy Reporting System (ARS), stating, "a scoping team would be tasked to, 'facilitate community understanding of the issue; assist in scoping and defining the issue; gather support for the request of an Issue Report, and/or; serve as a means to gather additional data and/or information before a request [for an Issue Report] is submitted'. On 22 July 2021, the GNSO Council confirmed the formation of and instructions to the Accuracy Scoping Team. The Scoping Team will be tasked to consider a number of accuracy-related factors such as the current enforcement, reporting, measurement, and overall effectiveness of accuracy-related efforts. These considerations are expected to help inform its deliberations and the development of recommendations to the GNSO Council on whether any changes are recommended to improve accuracy levels, and, if so, how and by whom these changes would need to be developed (for example, if changes to existing contractual requirements are recommended, a PDP or contractual negotiations may be necessary to effect a change).

Status/Health Rationale:

● This project was initiated on 22 Jul 2021 and has been downgraded with a Status of "Target will be Missed" and Health of "At-Risk".

Current Activities:

● The team is continuing its deliberations on assignment #2 (Measurement of Accuracy) and has commenced its review of the proposed write up for assignments #1 (Enforcement & Reporting) and #2.
● The team is working on reviewing and working out the details for the different proposals that have been put forward to measure accuracy. The focus for now is on proposals that do not involve access to registration data as the Board has directed ICANN org to develop scenarios for how ICANN org could obtain legitimate access to gTLD registration data to confirm accuracy that could be tested with the European Data Protection Board (EDPB). Once a response has been received from the EDPB, this is expected to help inform consideration of proposals that do involve access to registration data.
● The team will consider the expected impact on the timeline of this external outreach to advise the Council accordingly of expected next steps and timing.

Planned Activities:

● Finalize review of write up for assignments #1 and #2
● Finalize review of data accuracy measurement proposals that do not involve access to registration data.

Open Issues, Risks & Mitigation Plan:

● The Scoping Team is far behind the planned schedule for Assignments 2 & 3.
● The Scoping Team will likely need to be paused while it awaits a response from the EDPB on whether registration data can be legitimately accessed to measure the state of accuracy as well as to gather data to help inform Assignments 3 & 4.
● Search for a replacement Chair may be challenging and lengthy.

Completed in prior period(s):

● Completed Assignment #1 second reading.
● Completed and distributed Project Package for April.
