2 - Issue Scoping

Title:	Registration Data Accuracy Scoping Team (RDA_ST)
Description & Scope:	The GNSO Council adopted a proposal on 21 October 2020 which recommended that a Scoping Team address the effects of GDPR on Registration Data accuracy requirements and the Whois Accuracy Reporting System (ARS), stating, "a scoping team would be tasked to, 'facilitate community understanding of the issue; assist in scoping and defining the issue; gather support for the request of an Issue Report, and/or; serve as a means to gather additional data and/or information before a request [for an Issue Report] is submitted'. On 22 July 2021, the GNSO Council confirmed the formation of and instructions to the Accuracy Scoping Team. The Scoping Team will be tasked to consider a number of accuracy-related factors such as the current enforcement, reporting, measurement, and overall effectiveness of accuracy-related efforts. These considerations are expected to help inform its deliberations and the development of recommendations to the GNSO Council on whether any changes are recommended to improve accuracy levels, and, if so, how and by whom these changes would need to be developed (for example, if changes to existing contractual requirements are recommended, a PDP or contractual negotiations may be necessary to effect a change).

Status/Health Rationale:

- This project was initiated on 22 Jul 2021 and was downgraded in May 2022 with a Status of "Target will be Missed" and Health of "At-Risk".

Current Activities:

- The team is in the process of conducting a final survey to assess whether any further proposals need to be put forward in the write up for assignments #1 (Enforcement & Reporting) and #2 (Measurement of Accuracy). Once the survey has completed, the Scoping Team will finalize the write up for submission to the GNSO Council.

Planned Activities:

- Finalize review of write up for assignments #1 and #2 and submit to the GNSO Council for its consideration.

Open Issues, Risks & Mitigation Plan:

- The Scoping Team is far behind the planned schedule for Assignments 2 & 3.
- Some work of the Scoping Team will likely need to be paused while it awaits a response from the EDPB on whether registration data can be legitimately accessed to measure the state of accuracy as well as to gather data to help inform Assignments 3 & 4. In the interim, the Scoping Team may propose focusing on further work that does not require access to registration data.
- Search for a replacement Chair may be challenging and lengthy.

Completed in prior period(s):

- The team engaged with ICANN org to provide input on the scenarios for how ICANN org could obtain legitimate access to gTLD registration data to confirm accuracy that could be tested with the European Data Protection Board (EDPB).
- The Chair of the Scoping Team provided an update to the GNSO Council, including the expected impact on the timeline of the outreach to the EDPB to confirm if/for how ICANN org could obtain legitimate access to gTLD registration data to confirm accuracy, during its May Council meeting.
- Completed and distributed Project Package for June.
