Synthesis Document

OPEN INPUT PERIOD FOR THE 2019 APRIGF VLADIVOSTOK SYNTHESIS DOCUMENT

¶ 1 **Safer Internet, Cybersecurity and Regulation** 9

¶ 2 The growing concerns on issues such as misinformation, fake news, hate speech and harassment, online violence and terrorism, organized cybercrimes, data breaches result in a decrease of trust as well as a wave of state regulations to mitigate the cybersecurity risks. To maintain cyber hygiene, what kind of policies and governance model shall be adopted to tackle these issues and achieve a safer Internet? What should be the key considerations for states when creating these regulations? How shall we maintain legal interoperability of laws and extraterritorial data protection on the Internet? Should the Internet be regulated by the states solely and what is the impact of these existing regulations on the Internet? How should the balance be drawn between state interference on Internet infrastructure and a free and open Internet? 5
