

Siranush Vardanyan - SOI

During the period from 2000 till the end of 2007 I held different positions in Project Harmony Armenian Branch, working in Armenia School Connectivity Program project (www.ascp.am), which was aimed at integration of ICT into education sphere in Armenia. I was responsible for the overall administration of 330 Internet computer centers in secondary schools in Armenia. Within the Project Harmony organization, being in a senior management team, and being a Trainer of Trainers on Online Facilitation and Online Project Development, I have initiated and facilitated numerous online projects with involving different strata of the community, such as journalists, businessmen, teachers, students, children with fewer opportunities, NGO representatives, etc. I also initiated several online partnership projects with involving children and teachers from Armenia and US. For 7 years I was in the Senior Management Team of this organization and coordinated the works of about 700 people, including 2 teachers working in each Internet Computer Center (330 centers), Regional Field Coordinators (30 Regional Community Developers and Program Coordinators).

I started my involvement with Internet Governance issues on international level by being selected to participate at the **Online Course on Capacity Building Program** on Internet Governance in 2007, organized by Diplo Foundation. During online classes, I had been exposed to a wide variety of views on Internet Governance, with learning based to a large extent on the exchange of knowledge. After that, being one of the best students of the course, out of 138 total students, I received fellowship to participate at the **First Summer School on Internet Governance** in August 2008 in Meissen, Germany. During that summer school I had a chance to meet with different constituency representatives, involved in IG issues.

Since that period I learned about ICANN and actively participated in different ICANN Public meetings. I became a **four time ICANN fellow** - the 31st ICANN Public meeting in New Delhi in February 2008 and 33rd Public meeting in Cairo, in November 2008 and the 35th Public meeting in Sydney in July 2009, as well as I participated on my own expenses in 32nd ICANN Public meeting in Paris in June 2008. I also was one of the fellows in ICANN Public Meeting in Singapore this year.

At the end of 2008 I volunteered and was selected to be one of the 6 members of Internet **Governance Caucus (IGC) Nomination Committee for Multistakeholder Advisory Committee (MAG)**.

In 2010 I became an **ISOC Ambassador** for IFG 2010 in Vilnius, Lithuania. During the IGF 2010 I was one of the remote moderators, particularly the session # 26, which related to the presentation of Summer Schools on IG in Europe, Asia and Latin America. I am selected as an **ISOC IGF Returning Ambassador for IGF 2011 in Nairobi, Kenya**.
